NATO Vows To Maintain **UN Support** In Bosnia

U.S. House Votes, 318-99, To End Arms Embargo On Besieged Muslims

By William Drozdiak

BRUSSELS - NATO defense ministers vowed Thursday to sustain the use of alliance air power to support United Nasons peacekeepers in Bosnia while also stepping up preparations to rescue the en-tire 22,000-man UN force if the situation on the ground does not improve in the next

Defense Secretary William J. Perry hailed the creation of a rapid-reaction force as "a turning point" that could en-hance security for the beleaguered UN peacekeepers and salvage a humanitarian aid mission that has been paralyzed by hostage-taking and other attacks by rebel Bosnian Serbs.

[The House of Representatives voted Thursday to require President Bill Clinton to lift an arms embargo on Bosnian Muslims as it approved a hill that would cut foreign aid sharply and dismantle three foreign-policy agencies, Reuters reported from Washington. Page 6.

[The House attached the provision to end the arms embargo by a 318-to-99 vote and then approved the overall hill by 222 to 192. The bill will have no effect, howevet, unless it is also approved by the Senate and survives the veto promised by Mr.

France, Britain and the Netherlands have pledged to send as many as 10,000 troops for the new force, which would be highly mobile and used to keep aid supply lines open. The United States has declined to contribute any troops but has offered logistical and intelligence help.

Mr. Perry and other ministers said the North Atlantic Treaty Organization was committed to doing everything possible to maintain the UN peacekeeping force in Bosnia because their departure could trig-ger a nightmarisb human catastrophe and and the could be seen at the could be get ad the frontiers of the former Yugosla-

But a senior British official said that the latest wave of hostage-taking and other attacks from Bosnian Serbs directed against UN peacekeepers had underscored need for "strategic consent" from al helligerents. He said that unless the attacks stopped and the new reaction force succeeded in its protecting mission, a decision to pull out the peacekeepers could be made by late August so that it could be completed before winter sets in.

"If this last chance fails, then only the safety net of withdrawal remains," said the German desense minister, Volker Rühe. "But it would be a human catastrophe and politically highly undesirable."

In making the case for the peacekeepers. Mr. Perry noted that the civiliza death telihad dropped from more than 100,000 in 1992, when the UN mission was tils-patched, to less than 3,000 last year. But defense analysts said the sharp reduction in casualties was largely due to the decline in fighting since the rebel Serbian soldiers had captured and held 70 percent of the country.

While emphasizing their desire to keep the UN peacekeeping mission alive, the NATO ministers spent much of the day reviewing pullout plans that could involve up to 50,000 NATO troops, half of them Americans, NATO officials said 14 counthes have now pledged troops to the rescue

Dramatic Rescue Saves 'a Tough Hombre' Who Survived on Bugs and Rainwater

Colonel Berndt, right, and other members of the rescue mission talking to reporters Thursday aboard the Kearsarge.

Pilot's Survival Kit: 'Guts and Training'

ROME - The American pilot who was rescued Thursday after hiding out in Bosnian Serbian territory for nearly a week

stayed alive on bugs and rainwater and stayed free on his wits and survival training, military officers said.

"This is a tough hombre we're talking about," said NATO's southern Europe commander, Admiral Leighton Smith. "Whatever else he had, he had a lot of guts to go with it. That's what he had — guts

After his rations ran out, the pilot "told us he began on bugs and rainwater," a U.S. Marine Corps doctor, Lieutenant Com-mander Paul Rochereto, said on the am-phibious assault ship Kearsarge. He speculated that the bugs were ants

Dr. Rochereto spoke after examining the pilot, Captain Scott F. O'Grady, who was taken to the sbip after his rescue by a snatch-force of Marines at dawn on Thurs-

day.
"He's really happy to be alive," the doctor said of Captain O'Grady, 29, who was being treated for exposure and exhaustion. Master Sergeant Nate Goolshy, superintendent of the Life Support division at the U.S. Air Base at Ramstein, Germany, said Captain O'Grady, like all pilots, had taken a two-week survival course before his assignment and had received refresher

courses each year. "They learn basic survival techniques like how to conceal themselves, how to find food, how to navigate land by both day and night," Sergeant Goolsby said.

They learn how to catch small animals and prepare them for food, how to identify edible plants and how to find water and shelter," he said.

Also instrumental for survival was the kit of supplies that every pilot carries with him on a mission. Sergeant Goolsby said. It can include a handgun, a small amount of food, including chocolate and sugar for energy, a compass and, in some cases, a Serbo-Croatian phrasebook.

The kit also contains a small, batterypowered radio, which Captain O'Grady used to make contact with a plane from his own squadron on patrol of the United Nations "no-flight" zone over Bosnia. It was this contact that allowed the Ma-

Amid Serb Fire, U.S. Marines Pluck Pilot From Bosnia

ABOARD THE KEARSARGE — Forty U.S. Marines swooped into Serbian-held Bosnia with two helicopters Thursday and dodged hostile fire to rescue a downed American pilot who had survived for six days on rainwater, bugs and courage.

The pilot, Captain Scott F. O'Grady, sprinted to a helicopter from his forest hideout waving his pistol, and shouting. "I'm ready to get the hell out of here." Two shots hit one rescue helicopter, while at least one missile was fired at the rescuers

The captain had been missing since his F-16 was shot down June 2 by a missile from a Bosnian Serbian stronghold southeast of Bihac during a routine patrol of the United Nations "no flight" zone over Bos-

The downing came in the aftermath of the abductions of hundreds of UN peace-keepers by Bosnian Serbs retaliating for NATO air attacks last month on their ammunition depots outside Pale, their headquarters 14 kilometers (9 miles) east of Sarajevo. So far, 232 UN personnel have been released, and 146 remain captive, frustrating negotiators trying to halt the hostilities in the three-year war.

Admiral William Owens of the Joint Chiefs of Staff in Washington said a multinational force took part in the rescue, including two U.S. Marine CH-53 helicopters that landed on a hilltop 50 meters from where Captain O'Grady had signaled the medicine of hetters programed radio. his position on a battery-powered radio.

Until then, the fate of the 29-year-old pilot had been unknown because an accompanying pilot did not see Captain O'Grady parachute. Some Bosnian Serbian officials in Pale had even claimed that they had captured the pilot.

Admiral Leighton Smith, commander of NATO forces in southern Europe, said the rescue mission began after a pilot from Captain O'Grady's squadron, flying an P-

voice on the radio.

The 2 A.M. signal was the first time that NATO had radio contact with the pilot, Admiral Smith said. -

Fifteen minutes earlier, NATO had received a Morse code message from Cap-tain O'Grady "that told us exactly who it was," a NATO source said, speaking on condition of anonymity.

Nearly five-and-a-half hours later, from first contact to the rescue, the pilot was safe on board the amphibious assault ship Kearsarge in the Adriatic Sea.

Kearsarge in the Adriatic Sea.

"This is a tough hombre we're talking about," said Admiral Smith, speaking in London. "Whatever else he had, he had a lot of guts to go with it. That's what he had—guts and training."

Colonel Gary Coward, a spokesman for the United Nations in Sarajevo, described the territory Captain O'Grady was found in as "woodland hills" without a heavy concentration of Bosnian Serbian forces.

"The Bosnian Serbs are stretched with

The Bosnian Serbs are stretched with the 1,000-mile confrontation line," he said.
"One would imagine there are not a whole host of units around. There may have been some reserves but that's largely speculation on my part."

Nonetheless, Colonel Coward said he was surprised that Captain O'Grady made it out alive.

"The pilot did very, very well to evade capture," he said. The rescue was mounted just after first light by an elite Marine Corps rescue team from the Kearsarge, the flagship of a three-vessel force of 2,000 Marines in the Adriat-

They were backed up by more than 40 NATO aircraft, including radar-jamming

A Marine Corps doctor abourd the Kearsarge said Captain O'Grady, al-though shot down from 20,000 feet, had See RESCUE, Page 6

EU Leader Fears War Saps Trust in Political Cohesion

By Tom Buerkle tional Herald Tribune

BRUSSELS - In a sobering assessment of Europe's role in the former Yugoslavia, the president of the European Commission said Thursday that the bloc's failure to end the war was sapping public confidence in Europe's political effectiveness.

Asked if the experience in Bosnia has been a disaster for Europe's ambitions to become a political power on the world stage, the EU official, Jacques Santer, said, Psychologically ... certainly."

The Bosnia effect makes it all the more essential, however, that European Union leaders show a commitment to forge a scrious foreign policy capability when they meet to overhaul EU institutions next year, he said.

"Europe needs to draw the political lessons," Mr. Santer said. "We need to define a common foreign and security policy."

The task will require an EU analytical center, a sort of fledgling State Depart-ment, to carry out preventive diplomacy, he said. In addition, he endorsed ending member countries' powers to veto EU

measures and switching to majority voting, a measure that Germany is pressing but which Britain has already vowed to resist. In an hourlong interview, Mr. Santer said he would present proposals to stimulate comployment at a summit meeting of European Union leaders in Cannes on June 26 and 27, but cautioned against

expecting any "miracle solution."

He said governments must fight the causes of Europe's persistently high unemployment, including what he sees as excessive labor regulations, rather than "repeating the mistakes of the 1980s" and relying solely on economic growth.

Mr. Santer expressed confidence that

the spending plans announced recently by the French prime minister, Alain Juppe, would not prevent France from reducing its budget deficit enough to adopt a common European currency in 1999.

Still, he said all EU leaders must give a

clear signal at Cannes of their determination to meet the low-deficit, low-inflation criteria for a single currency.

Mr. Santer also dismissed the prospect of a trans-Atlantic free-trade zone as ann-

KUALA LUMPUR - With China threatening further retaliation against the United States over the "pri-vate" visit of Taiwan's president, Lee Teng-hui, Asian and Pacific nations say they see the issue as another sign of serious erosion in the links between Washington. Beijing and Tokyo that underpin stability in the region. Weak and divided leadership in the United States, China and Japan, combined with growing nationalism in all three countries, threaten to upset the established power balance in the Asia-Pacific region before a new security order can take its place. Asian officials say. Such a development would undermine prospects for continued rapid economic growth in the area.

Officials and analysts say that the dispute between China and the United States over Mr. Lee's visit, the bitter U.S.-Japanese trade feud over cars and auto parts, and mutual suspicion between China and Japan over each other's growing military strength are causing severe

The tensions are fanning "nationalistic sentiments" in Japan, China and America, said Han Sung Joo, a former foreign minister of South Korea who is president of the International Relations Institute at Korea University in

Speaking at a conference on regional security here, he said there was a "high probability" that a protracted dispute between the United States and Japan would "hamper" their cooperation in regional security.

In an interview, Douglas H. Paal, president of the Asia Pacific Policy Center in Washington, said that leaders in the three countries, especially the United States, were increasingly preoccupied with domestic concerns and that this encouraged confrontation abroad.

"China saw that the Clinton administration was pushed by congressional pressure into granting the Tai-wanese president a visa to the U.S.," he said, "So China has concluded that it is pressure that moves the U.S. government, not strategic interests or goals."

Mr. Han said that the weakening of ties between the three countries was occurring when "Asia is lagging far behind Europe in community-building and is subjected to big power politics to a degree that is far greater than in

U.S. Envoy to Beijing Won't Wait for a Replacement

By Patrick E. Tyler

BEIJING - Deeply frustrated over the state of U.S.-China relations, the American ambassador, J. Stapleton Roy, is leaving his post next week before his replacement has been named by the Clinton administration.

Although Mr. Roy has told elose associates that the timing of his departure has nothing to do with the diplomatie crisis over the visit to the United States by President Lee Teng-hui of Taiwan, Mr. Roy's return to Washington on June 17 will only add to the image of downgrading relations.

A former Democratic senator from Tennessee, Jim Sasser, is expected to be nominated to replace Mr. Roy,

hut Mr. Sasser could face a lengthy confirmation process in the Republican-controlled Senate. It is not unusual for a gap of several months between ambassadors, but Mr. Roy had earlier told Westerners here that because of China's strategic importance, the Clinton administration would not allow him to depart until his replacement

Since May 22, when the Clinton administration announced that it was reversing 16 years of policy to allow a private visit by the Taiwanese leader, Mr. Roy has become a diplomatic pariah in official Beijing.

"He says no one will see him anyway, so why do we need an ambassador here?" one visitor to Mr. Roy's office paraphrased the ambassador's levity about his

One exception was a banquet the Chinese were hosts at

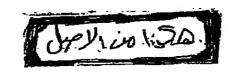

last week for a visiting American congressman, Repre-

sentative Dennis Hastert, Republican of Illinois. During the banquet, the Chinese government hosts

received a double surprise, first, when the congressman suggested that congressional pressure had nothing to do with Mr. Clinton's decision to grant Mr. Lee a visa to enter the United States and, second, when Mr. Roy biuntly took exception to the congressman's remarks. reiterating that Mr. Clinton acted only after Congress demonstrated its political resolve in the matter with overwhelming votes in both houses.

Mr. Roy grew up in China as the son of missionaries, and like many China specialists he publicly supported. but personally opposed, the White House decision to issue a visa to the Taiwanese leader, largely because of its

Building the New Asia/Infrastructure Megaprojects

Foreigners Vie for Deals **Process Fraught With Back-Room Intrigue**

By Paul Blustein Washington Post Service

AKARTA - Robert Edgell grimaces as be recalls how much time he bas spent in this traffic-choked city - nearly 500 days over the past three years. 've accumulated a lot of Grand Hyatt points," said Mr. Edgell, the 48-year-old executive vice president of Mission Energy Co..

referring to his usual hotel. Mr. Edgell has taken up semipermanent residence here because his California-based company, an affiliate of Southern California Edison Co., builds electric power plants. And the world's biggest power plants are being constructed in fast-growing countries such as

Indeed, the project that Mr. Edgell has been slaving over, a \$2.6 hillion, 1,230-megawatt plant being built in the eastern Java

village of Paiton, dwarfs anything being built, or even contemplated, in the United States. The fruit of Mr. Edgell's labor illustrates the great Asian infrastructure hinge of the late 20th century.

Megaprojects are springing up all over Asia, transforming this booming region. Rice paddies and hillsides are being paved over for superhighways and high-speed railroads. Inner-city pavements are being dug up for subways and telephone lines. Waterways and coastlines are being dredged for container ports and sewage-treatment facilities.

Asian countries need to invest about \$1 trillion on such projects during the remainder of this decade, according to the Asian Development Bank —and that figure does not even include Japan, which is spending even more on infrastructure improvements.

The spending is spurred by a desperate need to ease the bottlenecks that threaten to choke off Asia's rapid economic progress. The dazzling industrialization of the past two decades has generated borrendous traffic congestion, power sbortages, overloaded telephone circuits, clogged ports and overburdened rail and air networks.

So governments in the region are scramhling to plan, finance and install modern transportation, power generation and communication systems capable of sustaining even more blistering growth in the future.

AITON illustrates the buge stakes involved in this undertaking, not only for the countries of Asia but for the legions of foreign companies vying to win lucrative concessions and contracts. Especially for U.S. companies such as Mission Energy, whose domestic market has reached maturity, the surge in demand from Asia presents a whole new horizon of opportuni-

The U.S. doesn't have the tremendous need for new electric power generation. whereas there is a tremendous need in the growing economies of Indonesia. China and most of the countries of Southeast Asia, as well as Eastern Europe and Latin America." said James laco, the company's chief finan-

All this belps explain wby the Clinton administration is putting a beavy emphasis on gion. Infrastructure projects like these translate into jobs: Paiton is conservatively expected to create work for about 5,000 Americans. because the plant will use two steam turbines and two electric generators built by General Electric Co., and two coal-fired boilers built by Combustion Engineering Inc. of Stamford, Connecticut.

Yet projects such as Paiton also are loaded with pitfalls, raising the prospect that Asia's infrastructure boom will yield a barvest of white elephants and financial black holes.

Striking big deals in countries like Indonesia is a process fraught with back-room intrigue. Paiton has proven no exception, with prominent roles being played by people relat-ed to President Suharto of Indonesia or close to his family.

There are the broader political and financial problems, 100. Few Asian countries can afford to pay for all the improvements they need. Instead of relying on their state-owned utilities, they are allowing big projects to be run as private enterprises —often for the first time, and often by foreign companies such as Mission.

That means international bankers and financial institutions must be convinced the projects will earn a solid profit, or they will refuse to put up the hillions of dollars required for construction. But consumers in many of these countries are accustomed to paying low, subsidized rates for electricity and other services, and they are prone to raise

a fuss if they find their charges going up.

A Japanese-led consortium that huilt a freeway in Bangkok, for example, was forced hy Thai authorities to lower the tolls it charged because of protests from angry drivers - even though the tolls had heen agreed

overcome — and all the rewards to be gained — it is small wonder that Mr. Edgell and other Mission executives have devoted so much time and effort to the Paiton project.

There were times when I got frustrated. because it takes a long time to get decisions made in this government," said Mr. Edgell.
"The Indonesians decide things by consensus," be added. "But once the consensus is made, there is a resilience against going

It was the dawn of the 1990s when Mission. looking overseas for the first time. commis-

sioned a study to find the most promising market for its power plant business. "Indonesia came on the screen as a high

target." Mr. Edgell recalled. Indonesia enjoys a reputation for political stability and has the world's fourth-largest population. The nation's demand for power is surging at more than 15 percent a year as factories sprout throughout the archipelago. especially on the heavily populated main is-

land of Java. The state-owned utility, PLN, bas been unable to keep up with demand despite a huge capacity-building program in the late

So, for the first time, the government began considering proposals from private-sector groups interested in building a power plant with the aim of supplying electricity to the state utility under a long-term contract. The plant was to be located in Paiton, next to an

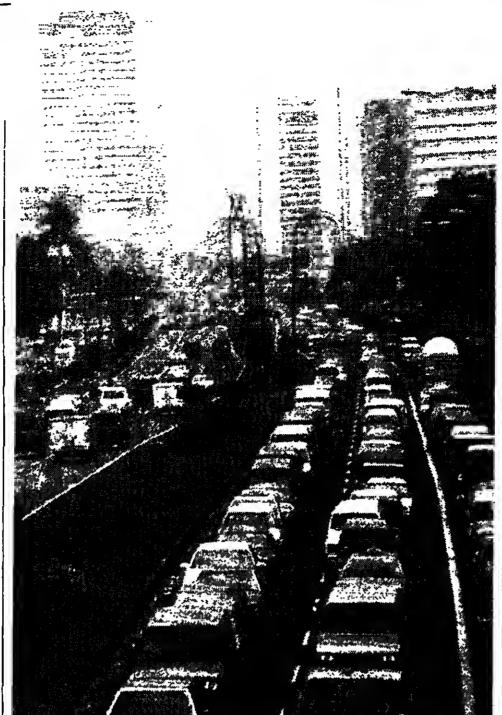

plant was to be located in ration, next to an existing power generation facility.

Mission tearned with two other internationally recognized giants, GE and the Japanese trading firm Missui & Co. But political problems quickly arose stemming from the Jakarta regime's pattern of bestowing lucrative contracts on businesses run by the presi-

dent's children. By early 1992. clared its intention to deal with a consortium led by a little-known U.S. firm, Intercontinental Electric Inc., and the Indonesian conglomerate Bimantara, beaded by Mr. Suharto's second son.

Independent experts hired by the govern-ment advised that the IEl-Bimantara group lacked the financial muscle and experience of the Mission-GE-Mitsui group, but IEI-Bimantara "had very influential people on their side," noted a participant in the negotiations.

The mission group had its own influential

A traffic jam in Jakarta - a typical bottleneck that Asian nations are seeking to ease.

member. Hashim Djojobadikusumo, a fastrising Jakarta businessman whose brother is married to one of the president's daughters. A Hashim-owned company joined the Mission group with a 15 percent interest and a contract to supply the Paiton plant with low-sulfur, clean-burning coal from Borneo.

Mr. Hashim personally pitched the advantages of the Mission consortium to the president, and in May 1992 the government decreed that the two groups should share the

A few months later, after the two groups were unable to reach an arrangement, the Mission-led consortium got the green light to start negotiating an electricity supply con-tract ahead of the rival group.

THILE saying that his group won because it bad "the superior product." Mr. Edgell acknowledged that Mr. Hashim's connections were "a contributing factor" behind the decision to bring him into the consortium.

Asked whether Mr. Hashim's company got

its 15 percent stake in the consortium without investing a commensurate amount of funds, Mr. Edgell replied: "They're investing with us. That's all you're going to get from me."
For 18 months, the Mission group was looked in propositions with the Ledgesian

locked in negotiations with the Indonesian authorities over the terms under which the Paiton plant would operate.

"It was a very interesting cultural experience," with Indonesians, Americans and Japanese involved, said Raymond Vickers, a Hong Kong-based lawyer with long experience in Indonesia who was called in by Mission when the negotiations appeared to be headed for stalemate.

"The Japanese and the Indonesians knew pretty well how to arrive at a deal, and understood each other," Mr. Vickers said.
"They were prepared to accept less than all

the legal, contractual protections that Americans expect," he added. "But the Mission people were used to the U.S. regulatory system," in which everything is spelled out.

The two sides finally signed a contract in

February 1994, but it was not until six weeks ago that the last big burdle - arranging the financing — was surmounted after more tough bargaining.
On April 24 just before a government.

imposed deadline, a consortium of eight international banks signed papers for \$1.82 billion in loans, backed by guarantees from the U.S. and Japanese export-import banks.

Now, with construction barely under way at Paiton, the Mission team already is dreaming of the next Indonesian power project. which, given the country's drive for economic

growth, appears sure to be sizable. "Indonesia, in our view, provides very good future prospects," said Edward Muller, the company's president.

Hong Kong Court. **Focus of Dispute**

By Kevin Murphy International Herald Tribine

HONG KONG - Britain and China failed to agree Thursday on the format for Hong Kong's new Court of Fi-nal Appeal as local fears grew that London is preparing to surrender in a crucial dispute with Beijing over the colony's future.

The eighth round of discussions on a matter once thought solved in principle lasted for more than eight hours before the two teams recessed. Talks reconvened, but a deal re-mained elusive on the structure of the body intended to replace the Privy Council as the highest tier of Hong Kong's legal sys-tem after it reverts to Chinese rule in 1997.

Concerns are mounting that China now wants to restructure the new court more to its liking after 1997, and that Britain is suddenly willing to accept this.

Hong Kong's governor, Chris Patten, had until recently attached great importance to the court being set up before 1997.
Beijing has threatened to abolish the local legislature after 1997 because it does not agree with political reforms instituted in the colony without its prior approval. This raises the specter of the new court being endorsed by a handpicked legislature.

The threat of a legal vacuum, or any major loss in confidence in the court system, poses a direct threat to Hong Kong's reputation as the dominant legal Hong Kong," he said.

and commercial center in Asia, lawyers and analysts said. Local legislators have rejected plans for a new court de-

signed along lines once thought to be approved by Beijing and endorsed by Mr. Patten. Hong Kong legislators have argued that more than one foreign judge should be allowed to sit on the panel of five jurists to be convened in the last stage of

a legal appeal for cases decided in Hong Kong's courts. Mr. Patten had repeatedly said that he wanted to see the new court established by 1996 a goal that requires legislators to approve its formation by the middle of this year. He has consistently argued that a flawed but completed deal was better than no deal at all, provided it as enacted under British rule.

Mr. Patten suggested Thursday that Britain would proceed without China's agreement on legislating for the new court if continuing negotiations remained fruitless.

But when asked directly whether it was still Hong Kong government policy to have the court set up hefore 1997, he gave less than a ringing en-

What I think is imperative whatever one manages to achieve, is that any court set up in Hong Kong should be able to carry out the same role as the Privy Council and that there should be, as far as one can manage it, no rupture in the judicial arrangements here in

Prozac Shown to Ease Severe PMS Symptoms

By Sally Squires
Washington Past Service

WASHINGTON - For the women who ride an emotional roller coaster the week before their menstrual periods, there is hope of relief. A major Canadian study shows that the antidepressant Prozac effectively reduces symptoms in more than half of women with the most severe form of premenstrual

The findings confirm results from a handful of smaller sudies of Prozac (also known by its chemical name, fluoxetine) and provide some of the most striking evidence of the biological roots of premenstrual syndrome, or PMS.

The study shows that PMS is "real disorder, that it differs from ordinary depression and that it responds to Prozac," said David Rubinow, clinical director of the National Institute of Mental Health.

What the findings also mean is that "for the first time in

years there are actual treatments that a woman can choose for PMS," said Peter Schmidt, chief of National Institute of Mental Health's reproductive endocrine studies. The study appeared Thursday in the New England Journal of Medicine,

Prozac, the most widely precribed anti-depressant in the: United States, has been taken by 16 million patients worldwide since its introduction in 1986, according to its manufacturer, Eli Lilly and Co.

Some physicians have already begun prescribing Brown and other similar anti-depaysants such as Zoloft (scritalist), Paxil (paroxetine) and Ana-franil (clomipramine) to treatsevere premenstrual symptoms even though they are not approved by the Food and Drug

Premenstrual syndrome describes a range of symptoms that afflict an estimated 40 percent to 70 percent of women of reproductive age at some point 4

TRAVEL UPDATE

SAS Dispute to Ground 800 Flights

STOCKHOLM (AP) - Scandinavian Airlines System said a contract dispute with the carrier's pilots would ground 800 flights for a 24-hour period starting at midnight Thursday. About 56,000 assengers would be affected by the combination strike and lockout, SAS added.

SAS said selective strike action by pilots caused the cancellation of 35 domestic and international flights on Thursday as last-ditch pay negotiations between pilots and management plodded on.

The airline's 1,600 pilots are holding out for a 6.7 percent annual pay increase but management has offered only 1 percent, a spokesman for the Danish Pilot Union said. Swedish, Norwegian and Danish SAS polots, dissatisfied with the lack of progress in month that they would carry out one-day strikes on June 9. 12 and 14 in support of their claims.

Two people suffering from cholera have been admitted to a Moscow hospital, the Interfax news agency quoted city medical authorities as saying on Thursday. Officials were trying to trace the source of the infection. (Reuses) International bus travel in Europe will be safer after 1997, when

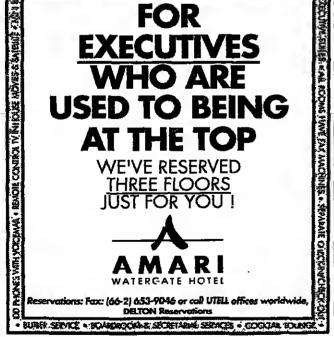

stringent safety requirements are introduced across the Continent, transport ministers from 31 European states agreed on Thursday. Only bases meeting strict safety and environmental standards would be allowed to cross national borders, and they would have to undergo regular safety inspections, a spokesman said. (Reuters)

The ancient Chinese city of Chang'an, once the gateway to the famed Silk Road trade route, is being rebuilt, the Xinhua press agency said. The new city will cover 2.8 square kilometers (1.1 square miles) and have 15 gates, four watchtowers and 16 terraces with avenues up to 70 meters wide, making it the world's biggest replica metropolis. It is to be built in Zhengzhou, capital of central

POLITICAL NOTES

Arkansas Governor Faces Fraud Charges Over Loan

WASHINGTON — Governor Jim Guy Tucker of Arkansas became the most prominent figure indicted in the Whitewater investigation whan a federal grand jury indicted him on charges of making false statements to obtain a federally backed loan and of conspiring to defraud the Internal Revenue Service.

ipton,

The state of the s

4

The indictment, on Wednesday, says that Mr. -Tucker, a Democrat and governor since 1992, tried to hide profits from a multimillion-dollar cable television deal in 1987.

The indictment was sought by Kenneth W. Starr, the Whitewater independent counsel, but does not involve President Bill Clinton or his former business partner, James McDougal.

The three-count indicament centers on Mr. . Tucker's purchase and sale of interests in the cable-television business, which made him millions of dollars as a businessman and lawyer. According to the charges he and a business associate. William Marks, Sr., fraudulently obtained \$300,000 in 1987 as part of an effort to buy cable interests.

In a separate case, a business partner of Mr.

Tucker in an Arkansas land deal pleaded guilty on Thursday to a misdemeanor charge of conspiracy to misapply a \$65,000 loan. Stephen A. Smith executive assistant to Mr. Clinton in his first term as governor, admitted to acquiring the losn on fraudulent pretenses and using it to pay off a larger loan that be, his father, Mr. Tucker and Mr. McDougal took out to finance the Kings River Land Co. development. (NYT, AP)

Prayer Amendment Slated

WASHINGTON — Opening discussions on one of the most contentious issues that Congress will face, a House subcommittee began to lay the legislative groundwork Thursday for a constitu-

tional amendment on school prayer.

The meeting of the Judiciary Committee's subcommittee on the constitution crackled with angry exchanges between Republicans and Democrats and between committee members and

'The decision of whether to have a prayer at

some kind of school activity should properly be made by the people that are involved in that activity, not by a federal judge, not by an ACLU attorney," said Representative Ernest J. Istook Jr., Republican of Oklahoma, the leadoff witness. "That is a community decision not a federal

"It's also the next civil war," shot back Representative Jose E. Serrano, a Democrat from New York, who said that his South Bronx district included 125 ethnic groups. He pressed Mr. Istook to explain how he would craft a constitutional amendment on school prayer that would protect the rights of followers of minority regions

Welfare Option Is Offered

WASHINGTON — The Senate Democratic leader, Thomas A. Daschle of South Dakota, on Thursday outlined an alternative to Republican plans to redesign the nation's main welfare program for poor people, and the Clinton adminis-tration endorsed his approach. Mr. Daschle said his proposal would abolish

the main cash assistance program. Aid to Families With Dependent Children, and replace it with guaranteed payments to low-income families for a maximum of five years.

Republicans would eliminate a long-standing provision of federal law that guarantees cash stance for anyone who meets the eligibility criteria, regardless of the total cost. By contrast, Mr. Daschle said he would preserve welfare as "a conditional entitlement of limited duration." He would also require able-bodied welfare recipients to sign contracts promising to work in return for their benefits.

Republicans control the Senate, so there is virtually no chance that Mr. Daschle's bill will pass. But Democrats said they would break off pieces of the bill and offer them as amendments to the Republican measure, hoping they might be accepted as part of a centrist compromise. (NYT)

One of Colombia's most powerful drug lords has been charged with importing tons of cocaine into New York and sending millions of dollars back home through an intricate money-laundering operation, according to a fed-eral indictment unsealed in Brooklyn. Law enforcement officials said the fugitive, José Santacruz Londono, is one of the top three leaders of the Cali drug cartel. (NYT) • A train slammed into a pickup truck at a crossing in eastern Oregon on Thursday, killing seven farmworkers in the truck, officials said. (Reuters)

Brazil Acquires Technology With Military Potential

WASHINGTON - Administration officials say Russia has provided Brazil with carbon fi-ber technology that could have military applications.

The deal appears to violate Russia's obligations under the international Missile Technology Control Regime, which forbids trade in such weapons materials, said the officials, who spoke Wednesday night on con-dition of anonymity.

The administration has begun extensive discussions with Brazil on its plans for using the technology, the officials said.

Brazil has said it needs the technology, which is used to build lightweight casings for rocket motors, as part of its civilian space program. But arms proliferation experts have expressed fears that because such rockets also could carry warheads, Brazil's possession of the technology could set off an

House Defeats Bid to Repeal War Powers Act

By Katharine Q. Seelye
New York Times Service

WASHINGTON - Despite a last-minute appeal from Newt Gingrich, the House has defeated an attempt to repeal the 1973 War Powers Act, leaving intact the requirement that a president must bring home troops within 60 days of deployment unless Congress authorizes their continued presence.

In one of its most significant foreign policy votes in two decades, the House voted, 217 to 201, late Wednesday not to repeal the law. Mr. Gingrich, the House speaker, and Representauve Henry J. Hyde, Republican of Illinois, who sponsored the repeal, said that they had failed to educate enough Republicans; but they also said the current conflict in Bosnia had scared Republicans away from giving President Bill Clin-ton a free hand overseas.

"A number of members felt that, on the edge of Bosnia, they didn't want a year from now to have done something that strengthened the president's hand," Mr. Gingrich said after

"They didn't want a vote to come back to haunt us."

But others argued that the bill was defeated on its merits. "Every president finds Congress inconvenient," said Representative Toby Roth, Republican of Wisconsin, who voted against repeal. "But we're a democracy, not a monarchy."

Many senior Republicans were among the 44 who joined 172 Democrats and 1 Independent in voting against the measure. Favoring it were 178 Republicans and 23 Democrats.

The War Powers Act, enacted over President Richard Nixon's veto after the United States invaded Cambodia during the Vietnam War, requires that the president remove U.S. forces from combat, or from situations in which combat may be 'imminent," within 60 days of their deployment, unless Con-gress subsequently authorizes their presence.

Members of both Congress and the executive branch have long believed the law to be unworkable and unconstitutional. But the Republican leadership was worried, especially as the fighting in the Balkans has eign affairs and strengthened in mongering during a delicate period in Bosnia. increased, that the freshman deserve to be undermined and Republicans were not support- cluttered and weakened." ing the effort to repeal the law because they could not fathom

president, particularly one and went against the repeal whom many in Congress view once Mr. Gingrich invoked Mr. as inept in foreign affairs. In a dramatic last-minute appeal, senior members of both parties were given a chance to persuade members on the floor,

"As chief spokesman in the House Republican Party," Mr. Gingrich declared to a chamber packed with Republicans but short on Democrats, "I want to strengthen the current Demopresident of the United States. and the president of the United

Senate Approves Tough Terrorism Bill

By Helen Dewar Washington Post Service

WASHINGTON - The Senate has overwhelmingly approved a Republican version of President Bill Clintoo's counterterrorism hill that includes the most stringent curbs ever imposed by Con-

gress on appeals by death row inmates. The legislation, which passed Wednesday by a vote of 91 to B, includes nearly all of the major recommendations made by Mr. Clinton after the April 19 bombing of the federal huilding in Oklahoma City to strengthen the government's powers to thwart, investigate and punish terrorist acts at home and abroad.

"This legislation will give law enforcement the tools it needs to do everything possible to prevent this kind of tragedy from happening again," the president said in a statement, "It will also help us prosecute and punish terrorists more effectively. I urge the House to do its part and get a bill on my desk without delay."

The House plans to begin action on a similar measure next week, virtually ensuring enactment of the bill, probably The House has also approved legisla-

tion to restrict death row appeals, and sources said it was likely to agree to its inclusion in the anti-terrorism bill.

broadened to include the party's longsought goal of sharply curtailing the ha-beas corpus appeals under which stateimposed death sentences can he challenged in federal court on consututiooal grounds.

The hill would limit most death row inmates to one appeal filed within one year uoder time limits that would conclude most cases within two years of sentencing. A second appeal would be allowed only under narrow circumstances, including new evidence that could not have been discovered during the first trial that shows "clear and convincing evidence" of innocence.

The legislation would "stop the frivolous appeals that are driving people the Judiciary Committee chairman, Orrin G. Hatch, a Utah Republican, argued during dehate.

But critics contended it would trample on one of the nation's most basic guarantees of a right to fair trial. "The perpetrators of the Oklahoma City tragedy will have triumphed if their actions prompt us to short-circuit the Constitution," said Senator Edward M. Kennedy, Democrat of Massachusetts.

Nearly 3,000 prisoners are under death sentence nationwide, hundreds for a decade or more. Many states have At the insistence of Republicans, Mr. imposed strict legal time limits on ap-Clinton's anti-terrorism proposals were peals, and the federal courts have steadidozen years without appreciably speed-ing the process. The bill would have no effect on state processes that often drag

on for years. The ann-terrorism bill would authorize more than \$2 billion over five years. Mr. Clinton proposed \$1.5 billion to strengthen anti-terrorism activities, including 1,000 new law enforcement offi-

It would increase penalties for terrorist crimes and conspiracies involving explosives, broaden federal jurisdiction over terrorist-motivated crimes and create a federal death penalty for terrorist

It would also streamline procedures for deporting alleged alien terrorists and expand government's authority to exclude suspected alien terrorists.

The Senate also agreed to Mr. Clinton's request for authority to require that tracing agents, called taggants, be included in explosive materials to make them easier to track.

The eight senators who voted against the bill were Russell Feingold of Wisconsin, Carol Moseley-Braun of Illinois, Daniel Patrick Moynihan of New York, Claiborne Pell of Rhode Island, Paul Simon of Illinois and Paul Wellstone of Minnesota, all Democrats, along with Mark O. Hatfield and Bob Packwood of

Philip Morris Secretly Studied Nicotine's Effects

By Philip J. Hilts and Glenn Collins New York Times Service

NEW YORK — In 15 years of previously undisclosed research, the world's largest tobacco company studied nicotine and found that it affected the body, brain and behavior of smokers.

That work is at odds with arguments by the company, Philip Morris, that nicotine should not be regulated under laws applying to drugs that af-fect the body.

pany's researchers used laboratory methods that are customarily employed in assessing drugs to study the effects of nicotine on smokers, and wrote about what they described as the "pharmacologic" effects of

HONG KONG — Unless China lets the United States off with scant retribution for allowing Taiwan's president, Lee Teng-bui, to visit there this week - an unlikely scenario few other major countries will soon follow Washington's lead in allowing such a trip.

Many privately sympathize with Taiwan's bid to break out of the long diplomatic isolation imposed upon it by Beijing, yet most countries, particularly in Asia, would rather not be asked to welcome a senior Taiwanese visit that could risk their trade with China.

Some, namely the countries of the Association of South East Asian Nations, did so in 1994. Mr. Lee, or Taiwan's second-ranking official, Prime Minister Lien Chan, made private visits where they often ended up playing golf with senior leaders of the host countries.

Although Beijing protested, there was was little real retalia-tion by China, an acknowledgment perhaps of the major role Taiwanese investors play in Malaysia, Indonesia, the Philippines and Thailand.

But given China's extreme agitation over Mr. Lee's "unofficial" U.S. trip, few Asian nation appear ready for another Taiwanese visit.

"There's no question this is an area where we all watch to see what other countries can get away with," said a Hong Kong-

But the UN agency said 40,000 Vietnamese migrants, who have been denied refngee status and live in camps in Southeast Asia, bad nothing to fear if they were sent bome.

"The pace of protests is clearly step-ping up," said the spokeswoman, Ruth Marshall. We can't attribute it all to the pending U.S. legislation. But the whole cli-

mate of frustration is linked to uncertainty, which is obviously in part with state officials who agreed attributable to the legislation.

The measure being debated by Congress would require Vietnamese and Laotian migrants in Asia to be rescreened for asylum, a process likely to take years and to cost millions of dol-(AFP, Reuters)

New Delhi Gets Water, **Heat Crisis Continues** Compiled by Our Stoff From Dispatches

NEW DELHI - A neighboring state bas agreed to end a water crisis in New Delhi, a city of 12 million residents, by releasing more water into the Yamuna River.

The dispute over the river's water had become so bitter that Prime Minister P.V. Narasimha Rao had to intervene. He met to release the water. But there was no respite from the beat

At least 100 people have died as temperatures reached nearly 50 degrees centigrade (122 (AP, AFP)

South Korea Balks on U.S. Accord

KUALA LUMPUR - The United States is struggling to persuade a reluctant South Korea to endorse a nuclear agreement with North Korea intended to end the threat that the North might obtain nuclear weapons, U.S. diplomats said gen for a

Thursday.

They said that after a telephone call Wednesday from
They said that after a telephone call Wednesday from President Bill Clinton to President Kim Young Sam of South Korea, the State Department sent a senior diplomat to Seonl to confer with Mr. Kim, who has expressed reservations about the terms of an agreement to provide two nuclear reactors to

In exchange for the new plants, North Korea has promised to forgo a nuclear weapons program and to shut down two older nuclear plants capable of turning out large amounts of plutonium, the essential ingredient in making nuclear bombs. U.S. diplomats in Malaysia, where recent talks with the North Koreans have taken place, announced this week that after months of stalemate, they had made important progress in negotiations aimed at ending North Korea's aspirations to build nuclear weapons.

But a U.S. diplomat said Thursday that while the Americans and the North Koreans may indeed be closing in on a final agreement, South Korea, which will pay most of the \$4 billion cost of the two reactors, was beginning to balk, 13 prompting the call from Mr. Clinton in Washington to Mr.

According to news reports in South Korea, Mr. Kim and his government are insisting that South Korea have greater authority over the project, which is expected to be built by South Korean contractors using South Korean nuclear technique.

Troop Buildup Alarms Pakistan

ISLAMABAD, Pakistan — India has sent an additional 80,000 troops into the disputed Kashmir region, and the matter is of "serious" concern for Pakistan, Foreign Minister Aseff Ahmed Ali said in remarks published Thursday.

The troops were inducted recently under the "excuse" of organizing elections in Indian-controlled Kashmir, Mr. Air.

said, but they have not been withdrawn despite the postpone. ment of the polls by New Delhi. According to officials here about 600,000 Indian troops and security forces were as Kashmir before the arrival of the reinforcements.

Mr. Ali, who was quoted by the official Associated Pressor Pakistan, said India had brought its troop strength in Kassmir to the "maximum" level. "That is a very serious matter

VOICES From Asia

Tomiichi Murayama, prime minister of Japan, visiting Tokyo police headquarters on Thursday to encourage investigators looking into the Tokyo subway nerve gas attack: "As the investigation reached a turning point, we have been able to recover public trust in Japanese police."

Li Jianxin, a manager at Zhejiang Securities, predicting that Shanghai investors would force down share prices as new stock comes into the market: "That's Shanghai for you.

Investors here just love to stir-fry the news." (Bloomberg)

Jim Bolger, prime minister of New Zealand, after Jim.

Anderton's leftist Alliance party offered no-confidence motions against the conservative government on Thursday That was an extraordinary example of a man breaking his word. Mr. Anderton gave his word to the nation on cames that he would support the largest political party in Parliament on motions of confidence. He said that at the election last year, he made a lot of kudos out of it and then today he just stood up in Parliament and tore this commitment — a very solemn commitment - up."

Kong insisted that it was not to blame. What bappened this morning at High Island was the responsibility of the Viet-In Geneva, the UN High Commis-

The violence followed a May 20 rampage in another detention center, White-

EUROPE

Even for Armenia, Democracy Has Some Limits

By Fred Hiatt Washington Past Service

YEREVAN, Armenia - For Bagrat Sadoyan, the promise of post-Soviet democracy turned sour in the early morning darkness of Dec. 29.

Armenian police summoned the newsman to the office of his wire service here in the Armenian capital, grabbed some documents and trampled the rest underfoot, confiscated his computers and took Mr. Sadoyan off to jail - all without court order or

scarch warrant. -For Mr. Sadoyan and his 50 employes, out of jail but still jobless five months later, the reason was clear even without official explanation: Their wire service, Hailour, was affiliated with an opposition party that the president had just suspended.

When the Soviet Union collapsed four-and-a-half years ago, 15 new or reborn countries burst onto the world stage, and all proclaimed themselves democracies. Freed from Communist oppression and Moscow's heavy hand. they promised free elections, respect for human rights and freedom of speech and belief.

. Today, the picture is quite different. Six republics are heavily authoritarian

Another six, including Russia and mocracy and a yearning for a stronger hand. Only the three Baltic republics appear to be moving steadily toward the promised rule of law, although

even there, major obstacles remain. "We are all sick, sick with the Communist bacillus," said Shamvel Shahinian, an opposition legislator in Armenia. "We were raised into communism, and it's very hard for us to imagine a new way to live."

Considering their economic problems, long-repressed ethnic hatreds and sheer inexperience, many of the new nations have done well to hang on even in part to democratic norms, analysts say.

Still, many republics have moved far from the initial vision of pluralism and rule of law. In Central Asia, the former Communist Party rulers of Uzbekistan and Turkmenistan have transformed themselves into unchallenged poten-

In Kazakhstan, President Nursultan A. Nazarbayev, who enjoys a reputation in the West as a moderate democrat, dissolved his Parliament this year, began ruling by decree and staged a

BRIEFLY EUROPE

Latin American Priority For Madrid at EU Helm

MADRID — Spain will push for improved ties with Laun America and southera Mediterranean countries during its European Union presidency, including an economic accord with Cuba, Foreign Minister Javier Solana said Thursday.

Mr. Solana said Spain would also seek to clarify Phase Three steps to economic and monetary union and achieving a single currency. A study presented to the seminar indicated that just 9 of the 15 EU members were likely to meet the criteria for mone-

tary union by 1999.

He defined the main priorities of the Spanish presidency as economic growth and employment; future members from central and eastern Europe; ues with the United States, Latin America and Mediterranean countries, and European security and defense. (Reviers)

Yugoslav Aid Pilfered

PARIS - Between 20 and 30 percent of European Union aid to the former Yugoslavia goes missing before it reaches those in need, the European commissioner for such matters said here Thursday.

Emma Bonino, whose portfolio includes humanitarian aid, said pilfering and blackmail requiring bribes by convoy leaders along the way accounted for most of the

Turkey Fined Over Jails

STRASBOURG — The European Court of Human Rights, delivering its list rulings in complaints against Turkey, ordered Ankara on Thursday to pay damages and legal costs to people imprisoned for unreasonable lengths of time.

The court ruled that two opposition

leaders - Nabi Yagei, general secretary of the Turkish Workers' Party, and Nihat

SPAIN SWOZE SWOZE

Sargin, secretary-general of the Turkish Communist Party — held for 2½ years on charges related to their political views before being acquitted, should be paid 30,000 francs (\$6,000) cach.

In a second case, the court ordered damages of 30,000 francs to Sadi Mansur, an Iranian convicted of drug-trafficking who spent 91/2 years in jail during trial proceedings. The court's authority was recognized by Turkey in 1990.

Lisbon Curbs Legislators

LISBON — Portuguese legislators voted early Thursday to clean up political life by passing bills to prevent conflicts of interest and discourage politicians from taking jobs outside Parliament.

Legislators will have to list what they consider to be potential conflicts of interest between their jobs in Parliament and outside activities in a "Register of Inter-ests." A new all-party Ethics Commission

will supervise their conduct. The bills, which must be approved by President Mario Soares before becoming law, increase the length of service by legis lators before they can claim pensions to 12 years from eight years. They also will only be allowed to claim pensions after age

Major Again Assailed

LONDON — Prime Minister John Major faced a new dispute over Europe on Thursday that stems from a report by an influential study group saying that he is wrong to oppose plans for a single Europe-an currency. Mr. Major himself kept silent

The group, led by the former Bank of England governor Lord Kingsdown, said Mr. Major's stated intention to oppose steps toward closer European integration at the Inter-Governmental Conference in 1996 would just leave Britain even more

Oil Dumping Protested

COPENHAGEN — Protesters reminded nine European environment ministers of pollution threats in the North Sca at the start of a conference Thursday in western

Svend Auken, the Danish environment minister, said the Shell company's Bret Spar oil storage, which is fitted with explosives in preparation for its dumping off Scotland, "is going to be a hot issue here."

Greenpeace, whose members have been occupying the Bret Spar in protest, erected a steel replica of the oil platform outside the congress center to symbolize the North Sea governments' attitudes about using the Atlantic Ocean "as a toilet for their indus-

For Romania Press, It's a Difficult Birth

Officialdom Throws Up Obstacles

By Jane Perlez New York Times Service

BUCHAREST -- On the top floor of a Communist-era apartment block, Neculai Munteanu dons headphones and readies himself before the microphone of a jerry-built high-tech radio studio for his show,

"News for the Trash Can." His breakfast-time barbs are delivered in a crackling style: How is President Ion Iliescu, a foe of the deposed Romanian monarchy, going to treat the visiting Duchess of York? Why is his rendition of the Romanian flute so weak compared with Bill Clinton's lusty sax? Mr. Munteanu, a reporter for Radio Free Europe whom Romanians used to tune into secretly, is back home poking fun at the government. His presence shows that freedom of the press has made a start in a country where such an idea would have been langhed at six years ago. But Mr. Munteanu acknowl-

There is freedom of the press and opinion; it's the most important acquisition of the revolution," said Mr. Mun-

edges that it still has a long way

teanu, 53.
"But our greatest problem is the average Romanian does not understand this, does not understand the issues and still lives in terrible misery. There's no such thing as a civil society here. But God himself needed seven days to create the world."

Since the overthrow and execution of Nicolae Ceausescu in 1989, the coalition government of former Communists and nationalists manipulates the levers of the mass media in ways learned under one of communism's most successful propaganda machines.

The government controls the only nationwide television channel and has taken recent steps to prevent compension. At 8 every night, about 80 per-cent of the television audience watches the government's stodgy newscast dominated by Mr. Iliescu and his aides.

The 14 newspapers that Mr. Munteanu tucks under his arm on the way to work give n de-ceptive impression. The papers,

and fantasy that pass as news. have plunged in circulation, in part because of the government's control of newsprint production and distribution.

Private FM radio stations like Mr. Munteann's reach only small audiences. Private television stations have opened in Rucharest and in the countryside but are restricted by regulation to local penetration.

Similar problems trouble television and the press in the region. Even in Hungary and Poland, the governments, composed of former Communists. remain uneasy with press freedom. But in Romania old habits seem harder to shed.

In the heady days of 1990, opposition newspapers opened. Romania Libra, an avowedly opposition newspaper, sold 1.5 million copies a day at its peak in 1992. But its circulation has dropped to 140,000 because of the government's control of newsprint production, according to Petre Bacanu, editor in

Only one newsprint plant exists in Romania, at an antiquated site 200 kilometers (125 miles) northeast of Bucharest.

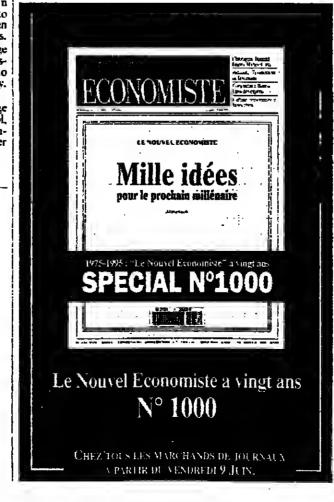

To make sure that he gets his ration, Mr. Bacanu says, be sends out a car to follow the newsprint truck along the route to Bucharest to ensure that the driver does not stop and get drunk or that if the truck breaks

down it is repaired. "If we didn't do that, the newsprint wouldn't arrive," he

With a national election scheduled next year and widespread irritation among Romanians at their dismal standard of living, the Iliescu govern-ment is determined to maintain

its television monopoly. Thus, the governing coalition postponed indefinitely a tender it opened last year for a national commercial television station. It had received bids from three private Bucharest chan-

The government has also blocked the establishment of a 13-member board intended to guarantee the independence of the national television station, a move that was supposed to satisfy fairness criteria established many of them filled with sex by the Council of Europe.

Would Cut U.S. Aid **Overseas**

WASHINGTON - Foreign aid would be cut sharply and three key foreign policy agen-cies would be dismantled under a bill approved Thursday hy the House of Representatives. President Bill Clinton has said he would veto any such measure.

The chairman of the International Relations Committee. Benjamin Gilman, Republican of New York, called the bill, approved by a vote of 222 to 192, a major step in streamlining the federal government while "ensuring that our nation continues as a world leader."

Democratic opponents called it isolationist.

Senate bills making similar cuts have been approved by that chamber's Foreign Relations Committee and are expected to come up for debate on the floor in several weeks. The House bill would abolish

the Agency for International Development, the Arms Control and Disarmament Agency and the United States Information Agency, consolidating their work into an expanded State Department.

The legislation would cut for-eign spending by \$3 billion over three years, with reductions in both foreign aid and diplomatic operations.

It would set aid levels at \$11.3 billion for the fiscal year beginning Oct. 1 and \$10.8 billion the following year. Mr. Clinton had asked for \$12.7 billion, just slightly above this year's aid level.

Overall, the bill would authorize \$31.8 billion over two years for both aid and the cost of U.S.

The only major aid programs unaffected by the bill's cuts are the \$3 billion for Israel and the \$2.1 billion for Egypt each year. On a 318-to-99 vote Thurs-

day, the House tacked on an amendment requiring the president to lift unilaterally the UNimposed arms embargo against Bosnia. Mr. Clinton has disregarded previous conhinding legislation on the issue.

There bave to be consequences of aggression," said Representative Albert Russell Wynn, Democrat of Maryland. But Representative Lee

Hamilton, Democrat of Indiana, who opposes unilateral action on the embargo, said lifting it would put 25,000 U.S. troops in Bosnia. "It will put Americans right in the middle of the hottest war today — a very. very unwise move." he said.

Mr. Gilman, who sponsored the hill cutting foreign aid, said: The Cold War has ended. I say it's time to reform foreign policy agencies."

House Vote As Events Swirl, Bosnians Despair

By John Pomfret Wushington Post Service

SARAJEVO, Bosnia-Herzegovina — Word that Captain Scott F. O'Grady of the U.S. Air Force survived on bugs and rainwater for several days in the heart of Bosnian Serbian territory brought a sad smile to the lips of Sead Senigdzic.

"I guess he knows what it's like to be a Muslim in Bosnia then," said the 36-yearold, who suffered the same fate for more than two months in a Bosnian Serbian concentration camp in 1992. "I welcome him to our club."

While the U.S. government celebrated the gutsy rescue of the air force pilot as old-fashioned American heroism, people in Sarajevo looked at the first foray of U.S. ground troops onto Bosnian soil in a different links

Whereas once they boped the U.S. government would help deliver them from their fate by facilitating the delivery of weapons to defend themselves against the Serbs, now many people said the American action to save the pilot was typical of the West's response to their country.

"It's like Bosnia is a big stage hut the Bosnian people have disappeared," said Danka Berberovic, a 63-year-old retired teacher who spent most of the day Thursday lining up for water at a pump periodically targeted by a Bosnian Serbian sniper.

"Of course, I am overjoyed that be escaped captivity because I know what those people can do," said the woman, who lost a son in fighting during the war. "Still, how can you celebrate so much when hundreds of thousands of people remain locked in a

Captain O'Grady's rescue was the latest in a series of events that have reinforced the impression here that the people of Bosnia have become bystanders in their

Over the last two months, conditions in Sarajevo and other besieged Muslim en-claves throughout this country have deteriorated precipitously. Today there is almost oo food, no water, no electricity or natural gas coming into the city because of a renewed blockade by the Bosnian Serbs.

But the widespread debate in Western capitals about the future of the United Nations' mission seems to many here more concerned with avoiding burnifiation at the hands of the Serbs than improving the lives

periment with your searching and rescuing, your no-fly zone, your new world order," said Sanela Husenovic, 21. "As long as you keep everything in this big Balkans theater, things will be O.K."

Mrs. Husenovic spent much of the afternoon tending spring onions and lettuce on a small plot of dirt next to a sign reading:

'Look Out! Sniper." She divulged that a Serbian gurman across Sarajevo's ravine occasionally "irrigates" ber field with his bullets, sometimes

when she is tilling her plot.
"I keep right on working," she said. Tve got a family to feed." Mrs. Husenovic said the plot's meager

'It's like Bosnia is a big stage but the Bosnian people have disappeared.'

Danka Berberovic, a retired teacher

harvest was more critical to her family than ever before. Serbian forces have com-pelled the United Nations to close Sarajevo's airport to aid flights for the past two months - the longest break in the world's longest airlift. Serbian gunmen have also shut the roads to UN aid convoys that would have brought food to the city.

Mrs. Husenovic's family received its last UN aid parcel three weeks ago—less than a pound of macaroni, a small jug of cooking oil and some green beans. Now they have run out.

As such, her family, like other Sarajevans, is digging into whatever stocks it amassed when times were a little better and one road was open to the outside

'We now have virtually empty warebouses and hardly any food to distribute," Mark Cutts, the bead of the Sarajevo office of the UN High Commissioner for Refugees, reported Thursday.

The situation has become so desperate that for the past five days, Mr. Cutts has ordered UN aid trucks to undertake a stealth mission, sneaking 250 tons of flour from Sarajevo's airport into the city via a Muslim suburb that is peppered daily by Serbian sniper fire.

"We're like a stage where you can ex- tons of milk powder for Unicer's baby

While there has been talk in Sarajevo that the UN forces bere would secure a road connecting the city to the outside world over Mount Igman to the west of the capital, hopes are now fading that such bold action could be expected from a mission that has avoided confrontation with the Serbs since it arrived in Bosnia in May

■ UN Moves Artillery Toward Capital

The United Nations peacekeeping force in Bosnia moved heavy artillery within range of Sarajevo on Thursday for the first time, apparently signaling a readiness to respond to aggression with considerable force, Roger Coben of The New York Times reported from Sarajevo.

The French Army dropped the artillery reinforcements by helicopter onto Mount lgman, where the one government-con-trolled road out of Sarajevo has come under persistent Serbian fire.

The reinforcements consisted of a 60man platoon and six heavy mortars with a range of about 7 kilometers (4 miles).

The 120mm mortars were flown from the French aircraft carrier Foch in the Adriauc. French UN officials said a shell was fired at the drop area on Mount Igman during the operation but caused no damage or casualties. It was unclear where it had been fired from.
In Paris, General Raymond Germanos,

the deputy chief of staff of the French armed forces, said the mortars would give French peacekeepers at a UN base on the mountain "the capacity to defend them-

The narrow and treacherous road over Mount Igman has assumed considerable importance for the United Nations over the past two weeks because the Serbs have blocked all the roads normally used to resupply the capital.

Lieutenant General Rupert Smith, the British commander of UN forces here, has drafied a plan to secure the Mount Igman road through the use of force if necessary. But UN officials in Zagreb, Croatia, and in New York are reluctant to back a plan that would almost certainly involve a direct fight with the Serbs.

Jacques Chirac, the French president. has made it clear that be now expects French peacekeepers — the largest contin-On Wednesday morning, five trucks gent in Bosnia — to shoot back if threat-rolled into the city before dawn carrying 50 ened or attacked.

refugee camps," he said. The "We need the doctors, the world has a pattern, he said, of judges, the lawyers, the people opening "hearts and pocket-who can belp us lift the coun-books" in a crisis but is slow to try," he said. "We don't need recognize the need for development when things sort of move off the front pages."

Rwanda's development needs will be reassessed at a meeting in Kigali in July. One Rwanda's representative at the economic recovery. Of the \$69 of his projects is assembling 50 specialists to help set up a court

> The United Nations faces a Friday deadline on the Rwanda question, one that is important to the future of international missions in small nations that tumble into catastrophe. There are now 5,586 troops, 317 military observers and 64 civilian police officers in Rwanda. Secretary-General Boutros Boutros Ghali is snggesting 2,330 troops, 320 observers and 65 police officers.

> Despite the threat of renewed war, Rwanda says that it does not need a large UN force for security. It wanted only about 500 troops to remain, but was persuaded to raise that number to 1,800. Rwanda agreed to accept a six-month extension of the force, but asked that the extension be final.

The Rwanda government, dominated by members of the minority Tutsi community but with a Hntu president and prime minister, took office last July after a Tutsi military force, the Rwanda Patriotic Front, took power. The takeover halt-ed months of bloodshed that began in April 1994, after the conntry's president, Major General Juvenal Habyarimana, was killed in a suspicious plane crash and his Hutu supporters unleashed a campaign of terror

and death against the Tutsi.

As the Patriotic Front came to power, Hutu began fleeing the country, leaving the capital and many towns in ruins. The country's central bank was penniless and government offices had no chairs or windows

Hostility against the United Nations, which withdrew a force last year as the genocide was beginning, runs high, Mr. Bakuramutsa was bitter

about UN claims that peacekeepers were in Rwanda to help in "confidence-building." "It is up to the Rwanda gov-

ernment and people to build confidence between themselves," Mr. Bakuramutsa said. "It is not an intermediary who can do that on our behalf."

Shimon Peres, right, greeting Mr. Christopher on his arrival in Israel Thursday for a new round of peace discussions.

Christopher Hails a New Era in Mideast

JERUSALEM - In an atmosphere of unusual optimism, the U.S. secretary of state, Warren M. Christopher, opened a new round of Middle East peace discussions Thursday and declared that "the cycle of war and terror" was ending.

He was greeted on his arrival in Israel by Foreign Minister Shimon Peres, who sounded equally upbeat, saying that sched-uled security discussions with Syria held out hope for "a complete peace in the Middle East."

Mr. Christopber also announced that Prime Minister Yitzhak Rabin would join him in Cairo on Friday for a meeting with President Hosni Mubarak.

Egypt was the first Arab country to make peace with Israel, in 1979. Relations have remained cool, although U.S. officials have praised Mr. Mubarak for his role in

supporting the peace process.

Mr. Peres said Israel and Egypt were entering a new phase in their relations. "The arguments are over," he said.

Egypt's foreign minister, Amr Moussa, said Mr. Mubarak would express "the Palestinian viewpoint" at Friday's meeting. "Israeli-Egyptian relations will also be discussed, including the nuclear issue, which cannot be ignored," Mr. Moussa

Egypt has been pressing Israel to allow international inspections of installations assumed to be part of a nuclear weapons.

Before his arrival, Mr. Christopher said that Israelis, Palestinians and Syrians

be in a problem-solving mode."
But he warned that approaching elec-tions in Israel and the United States made it essential to pick up the pace.

He called this "a moment of real mo-

mentum in the peace process."

But he added: "It's essential for the parties to accelerate the pace if they're going to achieve sufficient progress before the elections have an overhang on it." En route to Israel, Mr. Christopher said

he hoped the Cairo meeting would help ease tensions between Israel and Egypt. Egypt led an unsuccessful move to block indefinite extension of the Nuclear Nonproliferation Treaty unless Israel agreed to become a party and disclose its nuclear weapons program.

Israel Hit by Blackout, Snarling Businesses and Traffic

JERUSALEM --- A power failure struck most of Israel on Thursday, causing major traffic jams and shutting down businesses.

The failure, which began at 1:55 P.M., affected nearly the entire country, including Jerusalem. Tel Aviv and the Palestinian self-rule areas of Jericho and the Gaza Strip. Power was restored to most places

Ben Gurion International Airport's con-

trol tower and other systems were operating on emergency generators, and an airport spokeswoman said there were no

Israel's energy minister, Gonen Segev, told Israel Radio that the power failure occurred after two high tension wires short circuited, but the cause of the short circuit

Nonfunctioning traffic signals caused. major traffic tic-ups in Tel Aviv, where

drivers emptied water bottles on the hoods of their cars to keep them from overheating. The failure closed Tel Aviv's stock exchange, and the police were flooded with

reports of people stuck in elevators. Backup generators kept intensive care units operating at Jerusalem's Hadassah Hospital, said a spokesman, Yossi Shoval, but other areas of the hospital were without air-conditioning in the 30-degree Celsius (86 degrees Fahrenheit) heat.

Infrastructure Iguaçu, Brazil

November 27th and 28th 1995

An invitation to meet business, finance and government leaders from Argentina, Brazil, Paraguay and Uruguay to discuss the wide array of ambitious infrastructure projects

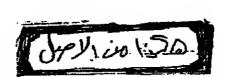

The International Herald Tribune, in co-operation with the Inter-American Development Bank and the Institute for European-Latin American Relations, is convening a timely conference on "Mercosur: Investing in Infrastructure." The conference will take place in Iguaçu, Brazil, on November 27-28, 1995 and will offer an exceptional forum for foreign investors wishing to profit from Mercosur's vast potential.

This major international gathering will focus on the extensive business opportunities for foreign investors, especially those offered by the wide range of ambitious infrastructure projects throughout Argentina, Brazil, Paraguay and Uruguay.

For full program details, or information about remaining sponsorship opportunit phrase contact Piona Cowair International Herald Tribune Conference Office; 63 Long Acre. London WC2E 9JH Tel: (44 171) 836 4802 Fax: (44 171) 836 0717

Contortions From Japan

Fifty years after the end of World War rants more than vague regret. Only a tiny II, Japan can still twist itself into conpercentage of the present populations of tortions over whether to apologize for its conduct in the war. The latest debate has yielded a feeble parliamentary resolution acknowledging Japanese aggression and colonialism, but only in the context of other countries' offenses.

Remorse or reflection about Japan's behavior is offered, depending on the translation, but no apology. While the whole exercise may seem irrelevant, Japan's tortured reckoning with history is part of a larger internal debate over its role in the world today. Until Japan comes to terms with the destructive role it played in Asia's past, it cannot play the con-structive role it should in Asia's future.

The bistorical issue is not colonialism, in which Japan had plenty of company. Nor is it military aggression alone. Imperial Japanese forces massacred millions of Chinese, conducted medical exper-iments on civilians and forced thousands of Korean and other women into sexual servitude to Japanese troops. This war-

percentage of the present populations of China, Korea and the colonized nations of Southeast Asia directly experienced Japanese atrocities. But Tokyo's refusal to apologize has fostered a potentially dangerous psychological breach between Japan and Asian neighbors.

Japan is Asia's richest, most techni-

cally advanced power. But it has played only a timid role in building the region's new trade and security systems. By contrast, Germany has played a major role in promoting European unity after accept-

ing full responsibility for its past.

During the Cold War, Japan was able to downplay relations with Asia and follow the foreign and security policy lead of the United States. That era is now over. With Tokyo and Washington growing apart over economics and China developing its military strength. Japan must play a more forthright role in the region. It can start by squarely facing up to its record in World War II.

-THE NEW YORK TIMES.

By Flora Lewis

PARIS — Japan's fragile coalioon government has been saved by a deliberately ambiguous compromise on a parliamentary vote about the country's role in oil supplies. They admit shame for losing World War II. It only shows how deeply and emotionally divided the country, which takes such pride in consensus and homogeneity, remains 50 years later.

There are profound differences in the way Japan and Germany have treated the history of the war. And they have a heavy weight on relations with former victims now and on contemporary policies.

In Japan, it is a contorted issue that underlies the dilemma of the role Japan should now seek in the world, and part of the strains in dealing with the United States, China, Korea and others. It has a habit of feeling victimized.

The new resolution settles nothing. The key paragraph says. Recalling many colonial rules and acts of aggression in the modern history of the world, we recognize and express deep remorse for those acts our country carried out in the past and unbearable pains inflicted on people abroad. particularly those people of Asia."

The word "apology" was unacceptable. No mention of Pearl Harbor, Nanking, etc. There are still many Japanese who fervently insist that Japan was not an ag-gressor but was seeking to liberate other Asian countries from Western colonialism, and was forced into war with the United States by Washington's efforts to cut off its

the war, but not guilt for launching it.

In a recent conference in Tokyo of the InterAction Council, a group of former heads of government who address world problems, Helmut Schmidt, the former German chancellor, put the question blunt-ly and, typically for him, pragmatically.

Speaking "as a German to my Japanese friends and hosts," he said that the two world wars were "caused by insane ideologies, by imperialistic dreams aimed at complete subjugation of other nations and by malignant indoctrination. Both Germany and Japan did become hated oc-cupants ... The price of hubris was defeat and humiliacon.

He named harsh specifics, and urged the Parliament to make a clear statement that "present generation deplores [the crimes] of the former generation." It would bring two important gains for Japan, Mr. Schmidt said: winning trust to East and Southeast Asia and removing the "heaviest impediment to foreign operations and leadership in many fields," He added, "You won't get leadership if you avoid it."

The audience, which included two formand the statement of the sta

mer Japanese prime ministers, was stunned. Later, one of them. Keichi Miyazawa, said meekly: "We were aware. It's good advice." But it was not taken.

The reasons stem from the whole structure of postwar Japan, its assumptions, its elites, and its politics. Professor Chihiro Hosoya recalled in an interview the statement by President Richard von Weizsäcker of Germany on the 40th anniversary of the end of World War II, that "those who are blind to the past cannot see the future. "We don't have such a statesman," he

said. "Our politicians just serve as a bridge between government and voters. They do things for local people.

Others oote that there has not been a real change in the system of rule, except to

There are still too many Japanese who admit shame for losing the war, but not guilt for having launched it.

contain the military. The same elites continued; the same manipulations of power.

The decision to maintain Emperor Hirohito until he died was central. Since he was considered divine, the source of all Japan's life, to admit national guilt would mean to call him guilty. And the fact that the Allies absolved him meant that the nation was absolved. As Ian Buruma says

in his lucid book "The Wages of Guilt," emperor-worship established a "system of irresponsibilities" that remains intact This is a tremendous historical irony,

since maintaining the emperor has always been acclaimed a wise American decision that made possible Japan's smooth postwar transition.

From the day Hirohito announced sur-render, there was not a single act of resistance, not one attack on the American occupation, although as the Nobel laureate Kenzaburo Oe recalls in an article about his astonishment on "The Day the Emperor Spoke in a Human Vmce," the whole country, including children, had been prepared to fight, even with bamboo spears, until it was annihilated.

. .

Some historians claim that the A-bomb wasn't necessary to preclude invasion and that Japan would have surrendered before it was dropped if only the retention of the Emperor had been promised beforehand. The argument rages.

One Japanese bureaucrat told me that Hiroshima was a cold-blooded "warrior-civilian trade" to save the lives of American soldiers at the cost of Japanese women

and children.

Professor Hosoya said, "We must pray on Pearl Harbor Day and Americans on Hiroshima Day." The legacy of war lasts longer than a lifetime. Japan must face it. We are all burdened.

A Veto and Plenty of Hype

President Bill Clinton cast his first veto on Wednesday, swatting aside a \$16.4 billion "rescission" bill that would have made some new appropriations while canceling others, including a relatively minor amount for education, midway through the fiscal year. The veto, suitably ac-companied by a speech in the Rose Garden at what the White House called a "drugfree schools recognition event," was less important than it was made to sound. So, too, was the underlying bill. Somewhere out there is written the rule that the less important the issue, the greater the noise and the longer the presidential speech. This was the latest example.

The vetoed measure had two purposes. One was to find money to offset the cost of \$6.7 billion in disaster aid, mainly for California, some spending in response to the April 19 bombing of the federal office building in Oklahoma City and \$275 million in debt relief for Jordan. The other was to serve as a symbol of, and a down payment on, the coming Republican ef-

fort to balance the budget.

The presideot said he, as much as anyone, was in favor of reducing the deficit and had decided to veto the bill only because of the mix of items in it. He complained that it proposed a cut in "safe and drug-free schools money" while protecting various public works projects, which he called pork. 'I cannot in good conscience sign a bill that cuts education to

save pet congressional projects," he said.
The House speaker. Newt Gingrich, responded: "If he wants to run for reelection, he ought to run in favor of a

balanced budget."
In fact, these rescissions weren't going to solve America's fiscal problem, not close, and the drug-free schools money is not going to solve the school drug problem, either. The spending cuts would have helped a little. There were other objectionable provisions in the bill, including a rider the president mentioned to suspend environmental laws the next two years in order to increase the timber harvest from federal foresis.

The problem was not the merits. on either side, so much as it was the hype. The president rightly accused some critics of government spending of setting up a false choice between asking people to help themselves and using government programs to help them. Often it is not either/or, but both that are called for, he said. "so this is. one more time, a phony, overly politicized debate here." He could have said that about the whole event. including his own dramatizing of it.

-THE WASHINGTON POST.

An Ethical Test for Dole

The new Republican majority in Congress has shown little interest in disturbing Washington's cozy and corruptive culture, especially the link between money and politics. A chance for the Republican Party to redeem itself will arise the form of a hill that would not shortly in the form of a bill that would put a stop to the meals, resort vacations and is that lobbyists and other specia interests bestow oo lawmakers to gain legislaove advantage on Capitol Hill.

A bipartisan group of senators plans to offer a measure that would ban such gifts and establish a new registration system requiring lobbyists to disclose their clients, their fees and their legislative issues. The Senate majority leader, Bob Dole, and most Senate Republicans supported a similar bill last year. But in the final hours of the last Coogress, Mr. Dole joined with Newt Gingrich, then the House Republican whip, to kill the reform, thereby denying the Democrats something to boast about on the campaign trail.

Whether Mr. Dole will now switch back to a reform mode as he embarks on his presidential run is unclear. Unfortunately, he has a handy alternative: a competing proposal that masquerades as

"reform" even though it would perpetuate the old system.

Its sponsor is Senator Mitch Mc-Connell, Republican of Kentucky, who tried unsuccessfully last month to kill the nation's public financing system for presidential elections. Mr. McConnell is likely to try to substitute his phony ban for the . That would set ut that will say much about Mr. Dole and his Republican allies.

The public could use some reassurance on the matter of congressional ethics. The Republican leadership, much like the old House Democratic leadership, seems quite content with the status quo. Instead of challeoging the Washington money game, the Republicans are scurrying to rake in record sums from special interests. They have allowed some of those same interests to play an intimate and influendal role in the drafting of important legislation.

Ignoring ethical quescions is, however. risky politics. The Republicans owe their present ascendancy in part to the Democrais' shameful failure to change the rules of engagement between money and politics. The Republicans may have forgotten that. The public has not.

Another Besieged City

As Europeans and others watch the destruction of Sarajevo, a city virtually un-scathed from 1939 to 1945, they should remember 1936 to 1939 and another besieged city, Madrid. Briosh, French and U.S. "nonintervendon" decisions effectively embargoed arms to both sides in Spain — the forces loyal to the republican government, and Franco's insurgents. This may have made formalistic sense because the conflict was a civil war, which today's war of Serbian aggression against Bosnia is not. And soon the loyalist side was so stained by Stalinism as to make a choice between the two sides unpalatable. The Spanish cockpit was the scene of

two rehearsals: of the arms and military tactics of the dictators, and of the democracies' impotent reliance on diplomacy to defang the dictators. What happened there did not matter only there, and what happens in the Balkans will matter elsewhere — for example at NATO headquarters. which might soon be boarded up if NATO has no relevance to genocidal aggression in Europe. When the U.S. president does not lead, NATO does not act. It is not too late to remove the UN forces. lift the embargo on Bosnia's means of exercising its right of self-defense, and convince Serbia that continued complicity in the genocide being commined by Bosnian Serbs will be bad

10. President Clinton's first term as chief executive is over. Everything he says and does over the next year and a half will be part of his campaign.

All of that will almost certainly be the same at the end of this year. Looking forward, the 1996 campaign it is a dreary prospect. Looking back on 1996, however, could be fascinating and historic.

Four candidates? Five. Seven. Nine. If something like that happens, the politics and governing of America will change radically. The two-party system would be a thing of the past. Could happen. But not this year.

Let's talk again in January, Universal Press Syndicate.

The Perplexing State Of German-Israeli Ties

By Michael Wolffsohn

MUNICH — Chancellor Hel-mut Kohl's visit to Israel this week went well, particularly considering its delicacy.
But conflict and crisis threaten

to sour relations between Germany and Israel. This unhappy many and israel. This unhappy prospect looms not because of, but despite, the policies of the German government, which, in this year of historical anniver-saries, maintains a closer relation-ship than ever with its counterpart in ferrel in Israel.

Just after the commemorations of the 50th anniversary of the end of World War II came the 30th anniversary of German-Israeli diplomatic relations.

On the government level, the balance of relations is overwhelmingly positive. Here, there is one important strategic problem: German cooperation with fran, which not only supports Islamic terror but appears determined to join the ranks of the nuclear powers - and which is a recipient of German economic

On the social level, however, the state of German-Israeli relations is troubling. While Israelis today entertain a more positive image of Germany than ever, the Germans have long ranked Israel

While anti-Semitism has receded in Germany, the level of and-Israelism is considerable. Polls show comparably low popularity ratings only for Poland destination of the German chancellor's next state visit - and

Russia. These, of course, are the two nations which, together with the Jewish people, suffered most cru-elly at the hands of the German National-Socialists.

The survey data do not bode well for the future of Germany's relatioos with its eastern neigh-

There are explanations. Many will argue that Israel's policy toward the Palestinians — at least from 1977 to 1982 - was morally questionable.

Regardless, Israel has undergone dramatic and fundamental changes. In 1992, Israeli voters chose a coalition committed to the peace process, and the Rabin-Peres government has assumed considerable risks to further the cause of peace. All this, however, has made little impression on the German people. Should a more hawkish government come to power in Jerusalem with the next elections, Israel's popularity in Germany is likely to sink further. And should a "dovish" coalition of Social-Democrats and Greens

then take over in Germany, crises on the government level are to be expected. Few Germans today display

historical and political sensitivity to the unique character of the Jewish state. For more than half of all Germans, Israel is a state "just like any other."

Some former subjects of the East German regime, despite and not because of the policies of that nation, have proven themselves more sensitively attuned to Israel.

While Anti-Semitism has receded in Germany, the level of anti-Israelism is disturbingly high.

"Zionism is racism" is the ootion that the East German regime unceasingly sought to inculcate in its citizens. Immediately after reunification, 33 percent of Eastern Germans said they believed it.

Meanwhile, despite attempts by their government to steer public opinion in the opposite direction, 33 percent of the Western agreed with the phrase. Does this demonstrate the futility of policy or the impotency of policy-makers?

An Allensbach survey in February 1993 found that an incredible 22 percent of the West Germans and 19 percent of East Germans believed that "a curse" lay on the Jewish people.

The same survey found that 44 percent of the West Germans and 34 percent of the Easterners believe that Israel exercised "a great deal of hidden influence in the world," pointing to widespread belief in the legend of an all-powerful world Jewish conspiracy. Independent of party

affiliation, nearly half of German voters shared this old prejudice. The polls show where the real work in improving German-Israeli relations needs to begin. The

discrepancy between governmen-tal policy and public opinion needs careful study.

This is also vital to German relations with the United States, where the great majority of politicians but also ordinary citizens count Israel as an area of vital American interest.

Mr. Wolffsohn is author of "Eternal Guilt? Forty Years of German-Jewish-Israeli Relations." He contributed this comment to the International Herald Tribune.

IN OUR PAGES: 100, 75 AND 50 YEARS AGO

1895: No Invasion Yet

ST. PETERSBURG — The reports published, both by the Russian and foreign papers, of Japanese preparations for occupying Corea are greatly exaggerated. Only small garrisons remain at Seoul and a few other points, and even in these cases the Russian government will shortly request Japan to fix a date of evacuation.

1920: A Good Smoke

LONDON - When the curtain rose on the first night of "Madame Sand" at the Duke of York's theater in London a few nights ago, some consternation was caused by the sight of Mrs. Patrick Campbell, in the title rôle, smoking a big cigar. An inves-tigation reveals the fact that London society women are generally taking to the cigar habit. A West End dealer says the ladies show more discrimination in the purchase of their own "smokes"

than in that of birthday presents for their husbands.

1945: Security Council

SAN FRANCISCO - Full agreement has been reached between Britain, America, Russia, China and France — the Big Five at the United Nations Conference — on a formula permitting the proposed world security council to receive complaints on international disputes. Secretary of State Edward R. Steminius jr., announced last night [June 7]. The agreement was a concession by the Russians who previously had insisted that the formula devised at the Crimean Conference be interpreted to permit the veto of any single great power preventing discussion of an international dispute. Basis for the agreement was said to have been laid in the conversation in Moscow between Harry Hopkins. President Truman's Personal representative, and Premier Stalin.

Stand on a Far-Off Border

By Sergo A. Mikovan

WASHINGTON — Why are Russian troops fighting on the Tajik-Afghan border? Are they attempting to reconstruct the Soviet empire, as the Western press seems to believe? Or are they fighting to defend legitimate defensive interests of Russia and of the West as well?

What Russia is fighting against is Islamic fundamentalism, signifying extremism and expansion. If the latter prevail, it will not just be Russia that

Usually descriptions of the situation in Tajikistan cite fighting between "Comunists" and the "Islamic democratic opposition." The latter term is absurd. Democracy implies freedom for all faiths and excludes priority of any one religion over others. This is exactly what "Islamic democratic" movements are not going to tolerate.

While the regime in Tajikistan may not be democratic. America too has

found it in its interests to support dictatorships. The regime is not expansionist or threatening to other countries, while the

Islamic fundamentalist opposition is. Active involvement of the Afghan "radical Islamic forces" has changed the nature of the war. The Tajik-Afghan border has become the border of the

To give up this border means to let secular societies in Kazakhstan, Kyrgyzstan and Uzbekistan be swallowed up by fanatics. That is why Tashkeni. Bishkek and Alma-Ata ask Moscow to defend the border.

A couple of hundred miles north of the Kazakh-Russian border, deep inside the Russian Federation, are the two big autonomous republics of Tatarstan and Bashkiria. The 'seeds of Islamic revolutions, 'professed by Tehran, and the Afghani virus of Islamic extremism would be easily encouraged there.

Is it acceptable, then, for Russian troops to bomb opposition armed camps in Afghanistan? Recall, if you will, Israeli actions in Lebanon, Or, even more recent, the Turkish invasion of Iraq's Kurdish regions with an army 35,000 strong. In fact, the only sensible policy for Russia is to defend the Tajik-Afghan border as if it were its own.

The writer, a researcher at the Institute of Peace Studies, Russian Academy of Sciences, is currently at the University of Maryland. He contributed this comment to The Washington Post.

LETTERS TO THE EDITOR

Bosnia and the West William Safire contends that pourbe given a say in their own firmre. ing weapons into Bosnia and dropping bombs on the Bosnian Serbs is

the best way to "win the war" ("A Bosnian Solution Is in the Air," Opinion, June 2). If successful, this "pour and drop" strategy would result in the death or expulsion of more than a million Serbs from their ancestral homeland. A similar fate would be met by the tens of thousands of Muslims in Bihac, loyal to Fikret Abdic, who do not support the policies of the

Izetbegovic government. Mr. Safire suggests that the Bosnian Serbs' reach for self-determination must be crushed. If the West is to

upbold basic democratic principles, then surely the Bosnian Serbs should

It must be recognized that there are four constituent groups in Bosnia: the Croats, the Muslims led by Alija Izetbegovic, the Muslims led by Mr. Abdic and the Serbs. The Western goal should be to ensure that no single group is allowed to impose its will on any of the others and that a mutually acceptable constitutional package is agreed upon.

The way to achieve this is to pressure all parties in Bosnia to negotiate directly with one another on equal

malnutrition, illiteracy, and some of the most prevalent diseases could be achieved in a decade, if given priority. - from UNICLE The Progress of Nations 1995 report

What's developing in developing countries is more children's minds like the one above.

The picture is looking better than ever.

MA.

N.

NOR

POR:

SWIT.

At last report, 71% of the children in developing nations are now completing at least four years of primary education. And even in the least-developed countries, a higher proportion of people are reaching adulthood with the ability to read and write.

As a company long associated with photography, we're happy to see this progress chronicled in such a heartwarming image as the one above.

But we're even more pleased to note what the image represents: the efforts of UNICEF and the many governments, non-governmental organizations, and

individuals who are working to improve the education. nutrition, and health of children throughout the world.

UNICEF's mission is to promote global well-being through local development. Its vision is a world where all children are protected.

At Canon, our vision is much the same. Because we, too, are a worldwide organization that believes in living and working together for the better- 1 ment of all people. Through local and

individual empowerment. Through social and ecological responsibility. Through constant efforts to improve the quality of life. Because we, too, believe the world can and must protect and nurture its children.

And we're sharing this space in the hope that more people will support UNICEF and its work, and that more children will be able to raise their hands.

Not just to answer their teacher's questions. But to embrace the opportunities that await their minds.

Canon

They Are The World.

A message from Harry Belafonte, entertainer, civil rights leader, and Goodwill Ambassador for UNICEF.

Some of my childhood memories are as vivid as if they happened vesterday. As I travel today and meet children from all over the world, I am reminded by their faces and by their

voices of how it feels when your opinions doo't count, your ideas have little value, and you are powerless to change the things around you.

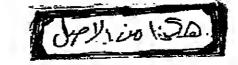

When I travel for UNICEF to Africa, Asia, Europe, or Latio America, where I grew up, I always take time to talk to and listen to the children - the most vulnerable of us. They have made it abundantly clear that they feel left out when decisions are made that affect their lives and that they feel held hostage by their societies and governments when political and economic decisions are being made abnul their future.

But each new generation offers humanity another chance. The United Nations Convention on the Rights of the Child, now ratified by 174 countries, ensures every child the right to survival and development, as well as protection from harm and exploitation. It also ensures every child the right to participate in the decisions that directly affect their lives.

When our time has come and gone, these children are the ones who will shape the world. They will be the world. It is the purpose of UNICEF and all of us who serve its cause to ensure that the children of our planet will have their own voice to the agenda of human affairs.

Stockholm in Summer: Modern and Pastoral

By R. W. Apple Jr.
New York Times Service

Stockholm last summer after an absence of almost 10 years, my teller machine or a microscopic bit of litter and the windows were spotless. seems grossly intrusive. Every factory along the expressway from the airport is modern, glacier-white and perfectly main- Conservative government then in power, tained. Every public space is immaculate, and she told me that in all her travels, she even tunnels and downtown squares. The had never come across a city that blos-retaining walls are faced with natural stone, somed in summer like her own. The days not concrete, and the light stanchions arch as elegantly as a giraffe's neck.

You will not fail to notice how fit everyone looks; this is the land of Bjorn Borg and Stefan Edberg. 'This is the only city,"
Betsey said once, 'where the women are so beautiful that even your wife looks out the summer we have been known to giggle." window and says. My God, look at that

But it is dangerous to try to describe the Swedes, or their capital, in dogmatic terms. Both change startlingly with the passing seasons. We stood in the square called Stortorget one spectacular June evening. with the temperatures in the 80s, as they were throughout our 10 days in Sweden. and found it hard to believe that it was the same place where, in the midafternoon darkness of December, we used to buy

get longer," she said. "the weather changes, the stone of the city looks less severe, the color of the water changes, and the people change, too — they shed their shells, they laugh, feel optimistic again. In winter we are often melancholy, but in

Stockholm is a modern city, filled with angular marble-and-glass buildings. If its pace is slower than London's or Milan's, if it sometimes seems curiously pastoral for a metropolis of 1.6 million, it is nonetheless an important financial center, the headquarters

Volvo and Electrolux. Ikea and Saab. But the sparkling waters of Lake Malar that surround the city's 14 islands soften the urban landscape, and tradition is still served. The three most important parts of fown are known as Normalm, the main business dishandmade trinkets at the Christmas market. trict; Ostermalm, adjacent to it, and Gamla

> ibullar, or Swedish meatballs, and a (highly redundant) fifth, dessert, usually fruit. According to local practice, the whole thing must be irrigated by small glasses of St. George (Goran to the Swedes) slaying burgers from the United States, gazpacho aquavit, accompanied by large glasses of

A second kind of Swedish culinary traestaurant—the name means "hip pocket" down — plus plenty of Wika, the best on the other side of the Opera House. brand of crispbread, from Dalarna. We restaurant - the name means "hip pocket"

Temptation, a baked casserole of potatoes, semi-salt anchovies, onions and cream, which tempts me as much as it did Jansson; beef à la Lindstrom, succulent little patties of beef, beets, onions and capers, and pytt i panna, aromatic beef hash topped by a fried egg or raw egg yolk. Swedish country cooking of a rather more sophisticated (and more costly) sort is served at two restaurants conveniently close to the department stores and other shops downtown. These are Greitz, an old café with a green glass front and claret-colored walls, where you might try spot that serves sausages flavored with marjoram and wonderful crayfish.

Even better, for my money, is Nils Emil, a cozy neighborhood place in Sodermalm, the southern section of the city, a 10-minute cab ride from the center. Filled with ship models, brightened by a crystal chandelier as well as halogen spots, graced by a beautiful blue country clock shaped like a bass fiddle, the place is packed every night. We had an herby Baltic fish soup, followed by roast wild partridge accompanied by two favorite Swedish ingredients, morels and lingonbernes, and finally a hor, moist apple cake with a vanilla-laced custard sauce. We drank an Italian white from Avignonesi and a claret,

Château Cantemerle. the dragon. Pink-and-white-striped banqueties greet you when you walk in, and an old yellow bar, and raw vegetables and dition can be sampled at the little Bakfickan remoulade sauce arrive the minute you sit sics, too. It's all terrific

There the specialty is humanskost, or home started with a plate of herring, salmon, eel cooking. This is oursery food: Jansson's and bleak roe, accompanied by Swedish boiled potatoes, neither waxy nor mealy. perfect without butter or anything else. Fish for the main course, too — for me, precisely timed halibut, the color of a polar bear, with tarragon sauce; for Betsey, salmon with spinach and a light tomato

Of all the restaurants in Stockholm, Lallerstedt's favorite by far is Wedholms Fisk, an austerely elegant establishment opposite the Royal Dramatic Theater, with dove-gray walls, big mirrors and a stain-less-steel chandelier. The walls are adorned with a few fine modern pictures from the collection of Bengt Wedholm, the funny, lively 75-year-old proprietor. His : food, based on flawless raw materials, is ... similarly understated. You suspect perfection is the goal when the waitress spies a piece of lint on a wine glass and replaces it rather than repolishing it. Confirmation comes when you taste the grilled turbot with Dijon-flavored hollandaise or the fricassee of sole, nurbot and lobster.

UT no doubt you might, like me, "No more fish!" When you do, head straight for P.A. & Co., a backstreet bistro that would be right at home in Santa Monica. Named for P.A. . von Rosen, the founder, this is the hangout Wretman's successor as the emperor of of Stockholm's film and advertising supreme Scandinavian delicacies, the Swedish hame cuisine is Erik Lallerstedt, crowds and assorted other young, hip, cured salmon called gravlax, served with a who owns several restaurants. He ran away beautiful people: the Ritz of Stockholm's dill-mustard sauce. A third might include at 17, was dismissed twice from jobs as a jeans generation. BRIDGE

By Alan Truscott

O the diagramed deal, from the 33d UJA-Federation game, most partnerships played in four spades and made 11 tricks. The winners, Diana Schuld and Jay Gould stole all the match points of the match the match points.

In response to the one cotrump opening, Gould as North checked for aces with a Gerber four-club bid, but he was oot sure that his partner was on the same wavelength and followed with four no-trump, asking for aces a second time. This ended the auction and fortuitously took the partnership to the right match-point contract since there are just two aces to lose in either spades or no-trump. There was some talk of a missed slam, and West volunteered that

a slam could not be made. West led a club to the ten and king, and Schuld cashed all the spades to reach an ending in which she held king-jack-seven of diamonds and the club queen. West had retained his two aces and two diamonds. and East four diamonds. South cashed the diamond

ace, led the four and stopped to

Page Cont consider when East played low. -She took the finesse for reasons that were part analytical and part auditory: West had parted with a diamond at an early stage and :

ing the club ace: the first trick had clearly indicated the club queen's location. Scoring the 13th trick hardly mattered, however, for 690 would have -: been a top score.

New Interactive' Boeing 777

By Roger Collis

1. 10 (10 CM) 10 (10 CM) 10 CM 10 C

NITED Airlines is looking for a big boost to business with the new wide-body Boeing 777 — which made its global debut with United Wednesday between London and Washington — thanks to "state-of-the-art passenger comfort and facilities" such as for the £4,000 I save by not flying Conthe highest ceilings and biggest overhead storage bins in the sky, plus "interactive" video systems (with 5.7-inch color LCD screens at every seat), umpteen audio and video channels, video games, electronic shopping, and the last word in satellite telecommunications. Oh, yes, and "a third more fresh air than other planes" (assuming pilots don't shut down air-conditioning packs to save fiel) plus wider, more comfortable seats, even for folks in

the back of the plane.

United's 777s will initially fly London-Washington, Chicago-Frankfurt, Denver-Chicago and Chicago-Washington with 292 seats in three classes. Economy has 231 seats with a 31-33-inch seat pitch and 18.5 inches wide in a 2-5-2 layout; business class has 49 seats with 49-inch pitch and 20 inches wide in a 2-3-2 layout; and first class has 12 seats with 64-inch pitch and 21.5 try the 777 in the next two years, you'll either have to fly United or a foreign line, such as British Airways or Japan Airlines.

State-of-the-art inflight entertainment systems, including live radio and TV, and satellite telecommunications, ergonomically designed seats, enhanced service, and above all more space, in spanking new aircraft are crucial factors in the airlines frantic attempt to lure recession-hit business travelers out of economy and back to the front cabins.

account for around one-third of passengers, but two-thirds of revenue. Downgrading has led to a calamitous decrease in airlines yields — profit per mile per passenger. Major airlines have had "yield dilution" of up to 30 percent over the last two

The fall-back is due to cabin-hopping — from first to business class, and from business to economy. According to the 1994
Air Travel Survey of 1,025 frequent long-haul travelers, published by TATA, while seats with 50-inch pitch, for which you pay travelers continue to report decreased trav- a premium of \$300 one way.s el budgets, nearly a third said they were

Cutting fares for high-yield passengers is

The Frequent Traveler

a slippery slope for airlines; instead they have added more and more frills to try and justify the price of the ticket while at the same time managing to debase the class system with a blizzard of promotions and deals.

ing replaced on many airlines with a larger. upgraded business class — more comfortable than first class used to be in the 1970s and SAA's 747 400s. - with jumbo reclinable seats (up to 60 inches of leg room), better meals served with real china, cutlery and glass, more drinks has 12 seats with 64-inch pitch and 21.5 than you can safely manage, and more electronic gizmos than you can possibly figure try the 777 in the next two years, you'll out how to use. Plus the run of an airline lounge, "fast-track" channels through immigration; limo transfers at either end, and

valet parking. Plus bonus miles. British Airways was first with an arrivals lounge at Heathrow where first- and business-class passengers could spruce up and get their act together. It was swiftly copied by Virgin, American Airlines and United.

Virgin Atlantic's Upper Class — which provides fully-reclinable sleeper seats with 60-inch pitch, and the amenities and com-The stakes are high. Business travelers forts of first class at business-class prices, was the prototype for other airlines aban-

Continental's BusinessFirst and Air Canada's Executive First aimed to combine first and business in a double-size business cabin. Both feature sleeper seats with a 55-inch pitch; KLM, Northwest and TWA have abandoned first class for a "premium" business class. SAS, which

But first class is alive and well with other business class is space and privacy.

traveling more. For airlines, the issue is airlines, especially Asian carriers. Seal how to recapture high-yield business pas- pitch is typically 60 to 62 inches and a 70sengers who are traveling or spending less.

I suppose some people can think of a to stretch out almost horizontally across galaxy of entrepreneurial reasons for five windows. Ansett Australia makes its shelling out £5,000 (\$8,000) for a round-trip Concorde ticket to New York when a full economy ticket is less than £900. But I'd prefer to think of entrepreneurial uses itors with a choice of 40 movies, plus meals served by a proper in-flight chef, not just someone in an apron. Cathay Pacific spent \$10 millioo refurbishing first class on its new Airbus fleet. British Airways offers first-class passengers a Sleeper Service on

deals.

First class, costing up to twice the price of business class (it is only 24 percent to 60 percent more on Asia/Pacific routes), is beer. Avía claims that its 747SP shaves 40 minutes off the current flying time of BA

> Ull economy is probably the worst buy in the sky — unless you plan to use it for an upgrade. If you've got to sit in sardine class it makes sense to shop for the cheapest fare. Many airlines are downgrading economy to ultratigh 10-across seating and 31-incb seat pitch — which makes business class almost seem like good value.

If you cannot upgrade to a better class of cabin, try to upgrade to better equipment, like the Airbus 340 or the Boeing 777 with high-tech amenities,

Experienced travelers know that there are only two kinds of plane - empty planes and full planes. You can put up with even the worst airline seating if you're next to an empty seat. Whatever the seat pitch, nothing beats stretching out across four seats in economy. Failing that, try to sit behind an empty seat, push the seat-back forward and stretch your legs over it. Couples can sometimes beat the system by asking for an aisle and a window seat in a three-seat row. There's a good chance the middle seat won't be taken. On a widebody plane you can increase the odds of having an empty seat next to you by asking for an aisle seat in the center section.

What you're really paying for in first and

Fed Chiefs Split on Outlook

Greenspan Sees Little to Fear

By Lawrence Malkin International Herald Tribune

NEW YORK - A dispute among the top American central bankers about the state of the U.S. economy has undermined bopes that they will quickly cut interest rates. The idea that the American

economy was losing strength fueled a rally in the bond market that pushed the yield on the 30-year bond down from nearly 8 percent in late January to just over 6.5 percent this week. Investors had been betting that the Federal Reserve Board would push down borrowing costs to forestall a recession. But Alan Greenspan, the Fed chairman, said Wednesday that

"while some slowing down was clearly very desirable," he did not foresee any shocks that would knock the economy off

"The probability of a significant inventory recession in the intermediate future - this is. the last part of the year and into next year and beyond - has decreased very significantly,"

Mr. Greenspan made his remarks at the close of the International Monetary Conference in Scattle. They were seen by some in Wall Street as a rebuttal to Vice Chairman Alan Blinder, who had said in an in-terview published that morning that he was more immediately concerned about the risk of an economic downturn than the danger of higher inflation. Mr. Blinder's remarks fueled

expectation on Wall Street that the central bank would move soon to revive the economy with lower interest rates, while Mr. Greenspan's tugged senti-

Merger Fever in Britain New Deals and Rumors Heat Up Market

By Erik Ipsen
International Herald Tribune

LONDON - Corporate takeovers, both real and rumored, briefly propelled the FTSE-100 index of leading stocks to a 15-month high Thursday in spite of more news hinting at an economic

The two takeover developments were a greatly sweet-ened hid for the shipbuilder VSEL PLC from General Electric Co. of Britain and the announcement of an agreed merger of two of Britain's largest cable operators.

The only explanation for the relatively strong performance here is takeover specu-lation surrounding a number of different stocks which has then spilled over to other stocks in their sectors," said Roger Barker, a UBS equity strategist who sees the market slightly overvalued after rising strongly in recent weeks in line with a powerful bond

rally.
Analysts say the combination of a strong stock market and a build-up of cash in corporate balance sheets has set the stage for the wave of take-

"Just like anybody else, when corporations bavemon-ey they find the temptation to spend it almost irresistible." said Peter Lyon, equity strat-egist at Smith New Court.

But few analysts actually foresee a return to the merger mania that swept the London market in the late 1980s. Many note that accounting rules have now been tightened, making it far harder for acquiring companies to boost their earnings per share sim-ply by hitting the acquisition trail. Such financially driven takeovers have now given way to strategic buys, they

The archetype of that more conservative class of takeover is the current battle for VSEL being waged by two of Britain's higgest defense contrac-tors. General Electric and

British Aerospace PLC.
On Thursday General
Electric unveiled its improved cash offer of £21.50 per share for VSEL, valuing the company at £835 million (\$1.33 billion). That tops a BAe hid launched last week by slightly more than a third, a rise in the ante that many analysts predicted would give the victory to General Electric. At stake in VSEL is not only a £2.5-billion order for Trafalgar-class nuclear sub-marines but a £411 million cash borde as well.

In contrast to the acrimonious eight-month tussle for VSEL, two of Britain's leading cable television operators revealed Thursday that they had quietly sewed up a merg-er of their own. Under the terms of that deal, TeleWest Communications PLC, the largest British cable-televisinn company, will merge with SBC CableComms, the country's fifth-largest cable company. The merger values

TeleWest at £2.3 billion and SBC CableComms at £679 Both companies stem from the American invasion of the British cable television market that followed its deregulation several years ago. SBC CableComs is owned by

America's SBC Communica-

cations Inc., while TeleWest is majority owned by Tele-Communications Inc. and S West Inc.

The combined entity will now have a total of 353,000 cable-television subscribers and 318,000 residential telephone lines, and a potential total market of 4 million homes, nearly a quarter of the market. Both companies cited economies of scale as a driving factor in the merger, a logic that is now widely expected to drive further mergers in the industry in coming

The biggest deal of the day. bowever, was the one that once again got away. Rumors of an imminent acquisition of the drug maker Zeneca Group PLC sent its shares rocketing 12 percent in early

But a slightly disingenuous announcement from the company in the early afternoon saying that it knew of no reason for the share price move other than investor confidence in its new products sent Zeneca's shares falling back. It closed at 1,065 pence, up from 992 pence.

At the same time some Zeneca's shares in the hope of quick gains from a buyout, others were bidding up the shares of the Swedish drug maker Pharmacia AB in the expectation that Zeneea would soon buy it. Share purchases in Pharmacia reached such a volume that its largest shareholder, Volvo AB, was forced to deny that it had entered into any talks with anyone to part with its 27.5 percent slice of the company.

Japan's Plan To Aid Banks **Leaves Doubts**

By Sheryl WuDunn
New York Times Service

ه کذا من لامیل

TOKYO - After calling the country's banking crisis the worst since the Depression, Ja-pan's finance minister on Thursday announced a rescue package aimed at restoring confidence in the world's secondlargest financial system.

The comments by Masayoshi Takemura were an attempt to demonstrate the government's resolve in curing Japan's ailing banking system, which is awash in bad debt amounting to at least 40 trillion yen (\$473 billion). That is the government's own estimate; others run as high as SI trillion or more, which would make it a far more serious debacle than the savings and loan crisis in the United States.

The rescue package also is billed as part of an overall strat-egy to stabilize the yen, which has risen 15 percent against the dollar since the beginning of the

Mr. Takemura called the package "bold and aggressive," but the measures included few concrete steps to ameliorate the banking crisis, and analysis were skeptical that the plan would help stimulate lending and investment and thereby reignite the country's sagging economy and stabilize the yen.

"Meaningless, in a word," said David M. Atkinson, banking analyst at Goldman Sachs

Since banks are plagued by a

very willing to promote lending, especially in the uncertain economic environment. In fact, loan growth has been negative over the past year.

David Threadgold, a bank a analyst at BZW Securities (Ja-s pan) Ltd., said the government's plan was "like rearrang- n ing deck chairs on the Titanic."

But analysts did say that the rescue package, to cover a five- d year period, was useful as a re-newed demonstration of the government's commitment to the the financial system.

In a document describing the e measures, the Finance Ministry 1did not offer any of its own funds as part of the rescue' package. Instead, it said the Bank of Japan would be authorized over the next five years to make "special" loans to hankrupt lenders, with conditions, a such as the resignation of top

The use of taxpayers' money to finance the ailing banking system has been a sensitive iss because many Japanese blame, the current recession partly on the banks. They would not like to see public funds channeled to the banks' rescue.

While Mr. Takemura did not directly allocate any public funds, he did call for a national, debate on the possible use of taxpayers' money to bail out banks. A Japanese analyst who did not want to be identified said it would be difficult for the government to commit to using any public money before elec-

EW YORK - Investors in America's largest mutual fund might not know it, but they are betting that the Federal Reserve Board is about

to ease interest rates — and sharply.

In a speech in New York, Jeffrey Vinik, manager of the \$44 billion Fidelity Magellan fund, spoke at length about what is, for a mutual-fund manager, a risky proposition — guessing the direction of interest rates.

The Federal Reserve, Mr. Vinik predicted, will lower short-term rates "very soon and very rapidly over the next several months." The prediction holds significant implica-tions for Magellan shareholders. All of Wall

Street knows about the fund's huge bet on technology stocks, which account for more than 40 percent of Magellan's assets. The strategy has paid off so far this year, as the fund has gained more than 18 percent. After technology, the fund's second-largest

group of investments, at 25 percent of assets, is in cyclical stocks, including big-ticket industrial manufacturers such as Caterpillar Inc., Deere & Co. and Parker-Hannifin Corp. Because the earnings of such companies

typically fall as the economy slows, a move by the Fed to extend the economy's growth by lowering interest rates could greatly improve their prospects. But there is also great risk in relying on lower rates to keep the prices of cyclical stocks moving up. While the Magellan fund's huge size gives Mr. Vinik a certain ability to

make self-fulfilling prophecies, his influence on Alan Greenspan and company is less of a certainty.

There is no better example of Mr. Vinik's ability to move markets than his bet on technology stocks, which have been on a rally for several years. As he began putting increasing amounts of Magellan's cash into technology stocks beginning in late 1992, other mutual funds and institutional investors have followed his lead.

The two big sector bets together leave the Magellan fund open to the possibility of a double whammy if, for example, the weakness in the dollar dissuades the Fed from lowering rates, undermining his cyclical-stock argu-ment, while technology stocks cool. Mr. Vinik offered no apologies for his out-

look, which he admitted flew in the face of reason if the economy is indeed taking a

"How can you own cyclical stocks when the economy is slowing down?" be asked rhetorically during a speech to subscribers to Worth magazine, a financial monthly published by a unit of FMR Corp., parent of the Fidelity mutual funds.

He answered with his rate-cut prediction. "As bullish as I am on technology stocks right now, I think the best opportunity in the U.S. stock market is in cyclicals." Mr. Vinik said. While companies such as Caterpillar have reported huge earnings gains, "most people think this is the top of the cycle," he continued,

adding. "I think we're going to have a pause and then they're going to take off again." If he's wrong, of course, the Magellan fund could be in for a rough stretch.

Rockefeller Center Denies Control

NEW YORK (Bloomberg) — Sbareholders of Rockefeller Center Properties Inc., which holds a \$1.3 billion mortgage on the bankrupt Rockefeller Center, on Thursday denied Goldman.

Sachs & Co. control of the company.

By a wide margin, shareholders voted down a proposal to waive a 9.8 percent limit on the stake that any one shareholder may own. The move blocks Goldman Sacbs's Whiteball Street Partnerships from converting its warrants and stock appreciation rights into an equity stake of 19.9 percent in the company. The Goldman partnerships received the securities in exchange for a \$225 million investment in the company in December.

Suit Accuses Grace of Tax Evasion

WEST PALM BEACH, Florida (Bloomberg) - W.R. Grace & Co. set up a reserve fund that it used to avoid paying federal taxes owed hy its health-care unit, the company's former audit chief has

alleged in a lawsuit.

Norman Eatough, fired from his position last year, said the company's National Medical Care Inc. subsidiary failed to declare income set aside in the fund. The accusation was made in an age-discrimination suit filed in U.S. District Court bere.

 United States Shoe Corp.'s president and chief executive has resigned, less than a month after his company was acquired by Luxottica Group SpA, an Italian eveglass frame maker.

• UAL Corp., the parent company of United Airlines, is transferring 245 maintenance jobs to Indianapolis this month as part of a 10-year plan to eliminate 2,000 positions at San Francisco International Airport.

Lotus Bid Brings Out Speculators

By Peter Truell New York Times Service

NEW YORK - IBM's bostile bid for Lotus Development Corp. bas buoyed the spirits of the professional investors known as arbitragers, who seek to profit from mergers and takeovers. Arbitragers are snapping up shares of Lotus in anticipation of a higher bid for the software com-

Lotus's share price has soared since International Business Machines Corp. announced its \$3.3 billion bid, closing Thursday at \$63.50 - well above the offer price of \$60 a share. The arbitragers, or arbs, are clearly betting on a higher bid.

for the arb community if there's a bidding war," said Eric A. Longmire, director of research at Wyser-Pratte & Co., a money management concern and a hig

arbitrage investor. Even if IBM does not pay more, many arbitragers are betting that Lotus's best defense has to be to find another, probably

"I would assume the search is on to find a third party," said Peter Schoenfeld, vice chairman of Wertheim Schroder & Co. Several arhitragers quickly rattled off a familiar list of other bidders that might be interested in Lotus. AT&T Corp., Hewlett-Packard Co. and Oracle Systems Corp. are among the potential suitors.

The interest in Long among profession-

volume of the company's stock as institutions and individual investors have taken profits on their boldings and sold, often to arbitragers who typically manage tens or bundreds of millions of dollars. On Monday, the day IBM announced its bid, as many as 29.8 million Lotus shares traded, on Tuesday 9.5 million Lotus shares changed hands and Wednesday trading volume totaled 6 million.

The arbitragers have found many willing sellers: Those who held Lotus shares are pleased to realize profits of as much as 100 percent and more. Last week shares of Lotus traded at around \$30.

The institutions have been selling," early betting on a higher bid.

The interest in Lotus among professional investors has helped raised the trading want their sale out."

Spectra Vision Files Under Chapter 11

WILMINGTON, Delaware - SpectraVision Inc., a provider of in-room mov- \$25 million in order to hold onto 31.5 ies for hotels that emerged from bankruptcy in late 1992, filed for Chapter 11 protection Thursday in a U.S. bankruptcy

The company, based in Richardson, Texas, lost \$254 million last year and bas continued to stagger under a long-term debt load of \$546.4 million, which includes bonds issued in the last reorganization.

likely to lose his stake in Spectra Vision the normal course of business.

entirely in this bankruptcy. In the last restructuring. Mr. Davis put up another percent of the company.

In recent restructuring talks, SpectraVision bas proposed giving the company's common stock to bondholders and Electronic Data Systems Corp., a creditor.

A company spokesman said SpectraVi-sion had filed for Chapter 11 protection so that it could obtain debtor-in-possession Marvin Davis, the investor who bought the company in 1989 for \$60 million and negotiates with its creditors. It will seek the assumption of \$700 million in debt, is court approval to pay its trade creditors in

The total owed to outside creditors was not apparent from the Chapter 11 petitions filed by SpectraVision and its four units because the listed assets and liabilities included a mixture of bond and trade debt and inter-company debt.

SpectraVision listed assets of \$512 mil-

lion and liabilities of \$521.7 million.

SpectraVision supplies in-room, payper-view entertainment and information services to hotels in the United States, Canada, Mexico, Australia, the Caribbean and the Pacific Rim.

The company said its Canadian and Hong Kong operating companies would be (Bloomberg, AP) unaffected.

Dollar Slumps as German Rate-Cut Hopes Fade

NEW YORK - The dollar slumped against the Deutsche mark on Thursday after remarks from Bundesbank Vice President Wilhelm Gaddum dampened expectations that the German central bank would lower interest rates soon.

Speaking at a conference in Frankfurt. Mr. Gaddum said that while the stronger mark was "lightening the pressure on pro-ducer prices," be "wouldn't go so far as to say inflation isn't a risk anymore."

The dollar closed in New York at 1,4083 Deutsche marks, down from 1.4144 DM on Wednesday, and at 84.645 yen, down from 84,900 yen. It also fell to 1,1615 Swiss francs from 1.1642 francs and to 4.9515 French francs from 4.9675 francs. The pound fell to \$1,5965 from \$1.5895.

He added that the Bundesbank would

not let its policies be dictated by market expectations of an interest rate cut.
"Mr. Gaddum's comment that the

Bundesbank should not be too quick to satisfy the market's call for a rate cut" weighed on the dollar, said Dennis Pettit,

Foreign Exchange

foreign exchange manager at Long-Term Credit Bank of Japan in New York.

His comment came a day after Bundeshank President Hans Tietmeyer fueled expeciations of a German rate cut when he said the central bank's next move would not be to raise interest rates.

Mr. Tietmeyer's comments, along with remarks from Federal Reserve Chairman Alan Greenspan, drove the dollar higher in Asian trading. Mr. Greenspan said late Wednesday that the chances of a severe

economic downturn in the United States had "decreased very significantly."

The dollar rose to a four-day high of 1.4236 DM in Asia in the wake of the central bankers' remarks. But investors who had bet the U.S. currency would extend its gains reversed those wagers after the momentum of the dollar's rise faded early in Europe, analysts said.

Traders said Mr. Gaddum's comments had dispelled expectations of a German rate cut at the next meeting of the central bank's policy-setting council Wednesday.

The dollar's decline was stemmed by concern that officials from the Group of Seven leading industrial nations could come up with plans to shore up the U.S. currency when they meet in Halifax, Nova Scotia, for three days starting Thursday.

(Bloomberg, Reuters) phia, was more upbeat.

FED: Leaders Differ Over Dangers

Continued from Page 13 ment the other way -probably as he intended.

Mr. Blinder reiterated his pect a recession, he said economic growth had slowed from the 2.7 percent annual rate of the first quarter.

"There's some worry that it will be an excessive slowdown."

U.S. Stocks

he said, "and that's exactly what I mean about downside

Mr. Greenspan's remarks initially sent a chill through the bond and stock markets, which had been betting on lower interest rates. But they took heart cause a recession.

Thursday and stabilized with the release of the weekly report on new claims for unemploythe general trend leveling off.

The Labor Department reduce Friday, news services reported 372,000 new claims in ported from New York. the previous week, a slight decline from the 379,000 of the was revised downward by 10.000. The four-week moving average of new claims was 374,500, admittedly ahont 10,000 higher than a month earlier but only 1,000 worse than the previous week's revised

moving average.
"I don't find the current numbers disturbing in any way," said Robert Brusca, a chief economist Nikko Securities Co. "It plays right into Greenspan's hands."

The long-distance exchange between Mr. Greenspan and Mr. Blinder capped a day of public statements hy other Fed officials that give a fairly strong clue to the likely debate when the Federal Open Market Com- Benzak, Salomon & Farrell Inc. mittee next meets July 5 and 6 the second half of this year.

Telkom Spruces Itself Up Job Cuts Trim Its Loss Ahead of Privatization

BONN - Deutsche Telekom AG, a year before its scheduled sale to investors in what would be Europe's largest initial public offering so far, said Thursday that it slashed losses in 1994 by cutting jobs and wiring up more than 1.2 million new customers in the former East Germany.

The company predicted a "considerably improved" result for this year as early retirements accelerated and as it opened I million more lines in the East, for a total of 4.5 million since 1990.

The company said it expected 10,000 more jobs to be eliminated this year, reducing its work force to 215,000. It plans to reduce overall staffing from 225,000 to 170,000 by 2000.

its net loss shrank to 300 million Deutsche marks (\$212.1 million) in 1994 from 1.6 billion DM in 1993. Excluding 1.6 billion DM in losses carried forward from previous years, Deutsche Telekom said it made a pretax profit of 1.3

The state-held phone monopoly said it received nearly 16 billion DM in loans from the government in 1994 and returned 5.2 billion DM

in payments to the government. Any way you look at it, Deutsche Telekom is one of the most profitable companies in Germany," said Peter Hasler, an analyst with Bayer-ische Vereinsbank AG.

Chief Executive Ron Sommer, the former president of Sony Corp.'s European operation who was hired in March, forecast sales would rise about 6 percent this year, to 64 billion DM, as cost-cutting continued and more customers came on line in Eastern Germany.

The government plans to sell the first shares in the phone company next year, possibly in late spring. Joachim Kröske, chief financial officer, said he expected the sale to begin "shortly before the summer pause" in 1996, after financial results for another year are assessed.

The government decided last year to sell Deutsche Telekom. It hopes to raise 4 billion DM in the first sale of shares and eventually to bring in 15 billion DM from stock sales on German and international markets.

Mr. Kroske said the company was working with the U.S. Securities and Exchange Commission to adapt its procedures to reflect international accounting standards that would permit a sale of shares on the New York Stock Exchange. For the first time ever, Mr. Sommer said, Deutsche Telekom financed its investments last

year solely from cash flow from business activi-ties, which reached 22 billion DM. The company's revenue rose 3.7 percent, to 61.2 billion DM, in 1994.

High-Tech Unit Lifts Johnson **Matthey Profit**

Compiled by Our Staff From Dispatches LONDON - Johnson Matthey PLC on Thursday posted a 46 percent increase in pretax profit for its latest year, helped by a strong performance from its materials technology division.

The metal-refining company and electronics maker said profit rose to £95,4 million (\$151.7 million) as sales rose 11 percent, to £2.18 billion, in the year ended March 31.

The materials technology division's earnings rose 52 percent, to £42.3 million, with most of the gain coming in its worldwide electronic materials business and its chemical operations.

The company said the two joint ventures it launched during the year, Cookson Matthey Ceramics and Ryoka Matthey, were performing well. But the results included a £700,000 one-time charge for restructuring the ceramics venture.

Barclays PLC will lower its stake to 5.5 percent from 8.2 percent, while Midland Bank, a division of HSBC Holdings PLC, will lower its stake to 5.3 percent from

> Two other banks, National Westminster PLC and Bank of Scotland PLC, said they would not sell any of their holdings. The Bank of England and

> leading British banks owned 97 percent of 3i until last year, when they sold nearly half of their holdings as part of a plan to publicly float the shares. 3i was founded as Industrial

& Commercial Finance Corp. in 1946 by Clement Attlee, Its purpose was to create investment in small British businesses. It changed its name to investors in Industry in the 1970s. (Renters, Bloomberg, AFX)

EU Currency Plan Fails to Win Fans

By Brandon Mitchener International Herald Tribune

FRANKFURT — The European Commission's report on monetary union got a chilly reception in the monetary capital of Europe on Thursday, with the Bundesbank absent from a presentation of the position paper and other bankers voicing skepticism.

Yves-Thibault de Silguy, the EU's economics commissioner who presented the so-called green paper, faced an uphill battle in making an imtried European currency palatable to a largely suspicious German public.

Published last week, the green paper contains the commission's technical suggestions on when and how to introduce a common European currency. But many of the German bankers and husiness people who beard Mr. de Silguy describe the process were more interested in whether they should replace the Deutsche mark with an imtried Eurocurrency at all.

The European Monetary Institute, the forerunner to a European central bank, said it would have no official comment for weeks while the Bundesbank, reserving official comment, let it be known that it had found the commission's position paper premature and potentially counterproductive.

"The potential for mistakes in the commission's proposals is enormous," said one local monetary source who spoke on condition of anonymity. In addition to criticizing the lack of an institutional discussion of the green paper before its publication, the source found fault with the commission's sense of urgency.

By pre-empting the EMU's recommendations and calling for a two-track introduction of a common currency starting in 1999. critics said, the commission sent the message that politicians rather than central bankers would be calling the shots in Europe's most ambitious project of the next decade.

Mr. de Silguy fended off such criticism by describing the commission's proposals as an "invitation to a dia-logue" rather than a fait accompli. But moments later he said he was "deeply convinced" the commission's proposal was "the only possible scenario."

The commission foresees the introduction of a common European currency for use hy central banks and major commercial banks as early as the beginning of 1997. Widespread use of the new currency for everyday transactions would begin three or four years later.

The Bundesbank, which managed the introduction of the Deutsche mark in Eastern Germany five years ago, has said it prefers to delay the introduction of a single European currency until it can be done all at once, in a "delayed big bang."

KLM Profit Soars, but **Stock Falls**

AMSTELVEEN, Netherlands - KLM Royal Dutch Airlines said Thursday that net profit in its last financial year more than quadrupled, to 470 million guilders (\$298.8 million), but the airline's stock fell sharply.

The carrier said increased passenger and freight traffic and lower costs had helped profit to soar in the year ended March 31.

But analysts had expected even better results, and the stock fell 2.10 guilders, to 49.20. KLM said it would pay a dividend of 1.50 guilders a share, its first payout in three years.

The airline said cost controls and promotions had allowed it to benefit from an improvement in the economy. Sales rose to 9.2 billion guilders from 8.7 billion guilders.

For the final quarter of the year, KLM reported a loss of 89 million guilders, narrowed from 156 million guilders a year earlier. Sales in the quarter rose 3 percent, to 2.2 hillion guilders. KLM said it expected a 'slight improvement" in earn-

ings for its current year. That statement implies a strong improvement in operat-ing profit," said Cees Haasnoot of Effectenbank Stroeve. "This year, both wage costs and the tax hurden will increase strongly."

The company has paid no taxes for about three years because of its losses.

The carrier saved about 218 million guilders by suspending payments into its pension fund for most of last year. (Reuters, Bloomberg, Knight-Ridder)

Music Channels Enlist Big Allies

Compiled by Our Staff From Dispatches BEIJING - China announced details of its yearly round of bidding for oil-exploration tracts Thursday, in a crucial test of Western companies' patience after lackluster results

in the previous two rounds. Wang Tao, president of China National Petroleum Corp., said the 1995 round would officially open Friday for 12 blocks covering 112,739 square kilometers (45,096 square miles) in the Tarim and Junga basins in Xinjiang Province.

Beijing Fines Firm for Using A U.S. Name

BEIЛNG - A court has ruled that China's capital has room for only one U.S.A. California Beef Noodle King, the official Legal Daily said Thursday. The Intermediate Peo-

ple's Court ruled in favor of U.S. Hongli International, which bad filed suit over infringement of its trademark.

The court ordered Beijing West City Xingyan. which was using the American chain's name and bad only slightly altered its logotype, to stop using the trademark and to pay Hongli 99,390 yuan (\$12,000) in damages and legal costs, Beijing West City also

was ordered to apologize publicly for trespassing on the name, the daily said.

promising in terms of explorabeing about as local as McDonald's." Foreign companies will have the option of buying data pack-ages for the separate blocks be-Mr. Jamieson said at a recent Asian music market and conference here. "I'll bet Channel V was a lot closer to a Big Mac than rice congee when it started a tween June 19 and Aug. 31, af-ter which the actual bidding will year ago. Yes, we are vulnerable, but it won't belp either of us being publicly derogatory. We need time, and we need Oil companies' interest in the Tarim Basin, once called the

Ignoring the olive branch, Mr. Atyeo of Channel V just grinned, pursing his lips disapprovingly at the barrage of video clips rounding out Mr. Jamieson's

MTV Asia, controlled by Viacom Inc. of the United States, is locked in a bitter fight with Channel V, which is controlled by News Corp., the Australian media giant run by Rupert Murdoch.

In their battle over a market of more

than I billion potential viewers under age 25, the two music channels bave enlisted major record companies as allies.
In some instances, these alliances are at odds with similar partnerships elsewhere in the world. In Britain, for instance. News Corp. bas a stake in the Nickelodeon channel, which is run by

MTV Networks. MTV Asia's two new channels - a pan-Asian service in English beamed from Singapore and a Mandarin-language one broadcast from Taiwan -are run by a joint venture between Viacom and Polygram NV of the Netherlands.

Warner Music International. holding music videos from MTV Europe.

The same hattle could be set to take our programming."
lace in Asia: Sony Pictures EntertainThe record companies would gain little place in Asia: Sony Pictures Entertain-ment (Japan) Inc., Warner Music Group. EMI Music Ltd. and BMG Ariola Musik

MTV Asia, controlled by Viacom Inc., is locked in a bitter fight with Channel V. controlled by News Corp., the Australian media giant.

GmbH, a unit of Bertelsmann AG, have invested about \$50 million for a com-bined 50 percent share in Channel V. "We're watching the big four record companies invested in Channel V very closely to ensure they are not refusing videos to MTV." said William Roedy. president of MTV Networks International. "If they did deprive us of their videos, it would be a short-term gain at the expense of long-term losses."

Both music-video services strenuously denied favoring their respective partners. We were forced into the venture with PolyGram as a defensive measure

But in Europe, Viacom has filed an against the forces ranged against us," antitrust complaint with the European said Mr. Jamieson, the president of Commission against PolyGram, as well MTV's two Asian channels. "But it as Sony Corp., Thorn EMI PLC and would be death for us to play only Poly-

Gram artists." Those four companies are major share-bolders in Viva, MTV Europe's principal sure our record company partners would rival. Viacom charges that they are with-want us to flog their big names, but they want us to flog their big names, but they bave no creative control whatsoever on

by sacrificing video exposure of their art-ists to squeeze a competing network. "Our self-interest is to have as many thriving music TV services as possible," said Paul Ewing Southeast Asian regional director for Warner Music International.

MTV Asia was on the STAR TV network, Asia's biggest satellite broadcaster, until May 1994. The two companies broke off a two-and-a-half-year relationship after a dispute over revenue-sharing and management control. News Corp., which controls STAR, decided to create a music channel of its own. Channel V was born.

After a year on the sidelines in Asia, MTV is back in the running with its Mandarin channel aimed at viewers in Taiwan, Hong Kong, Singapore, China and 16 other countries. A separate English-language channel reaches the Philip-

pines and Indonesia.

MTV also broadcasts some programs
in Korean and Hindi. All told. MTV Asia's programming reaches around 20 million homes in about 30 countries,

according to network figures.

The STAR network says it offers Channel V free of charge to 220 million viewers in 53 countries in Asia and the Middle East. The service is tailored for three separate audiences and broadcast over independent satellite beams.

joint-stock banks.

Very briefly:

 Goodwood Park Hotel Ltd. of Singapore said one of its subsidiaries, Royal Garden Hotel (Jersey) Ltd., would buy the five-star Royal Garden Hotel in London for 143 million Singapore dollars (\$102.7 million) from Rank Holidays & Hotels Ltd.

 United Communication Industry PLC applied to sell 22.7 percent of its cellular phone network, Total Access Communication PLC. in an offering on the Singapore stock exchange.

 Hyundai Pipe Co. ordered a \$259 million cold-rolled steel sheet plant from a Japanese consortium led by Mitsui & Co. Analysts said the move would put the South Korean company among Asia's steel-industry leaders, pressuring Japanese firms.

· Hong Kong's export volume rose 18 percent in March from a year earlier, while imports grew 22 percent; import prices rose 5.2 percent, while export prices rose 3.3 percent.

Nikko Research Center Ltd., Daiwa Institute of Research Ltd. and Yamaichi Research Institute of Securities and Economics all lowered profit forecasts for Japan's biggest companies.

• Nikon Corp. plans to increase the amount of supplies it gets from overseas to 50 percent in the year ending March 31, 1997, from 20 percent; it has no plans to expand production abroad.

Reliance Industries Ltd., in a venture with Nynex Corp. of the United States, has applied for cellular-services licenses in all 20 of India's telecommunications regions.

• China's booming computer industry is expected to make products valued at 50 billion yuan (\$6.04 billion) this year, up 70 percent from 1994, according to the China Electronics News.

ernment's financial troubles.

Papuans Set Privatization Plans Wharf Denies Imminent Sale of August to allow it to assess their potential value. Of Omni Hotels ■ New Era for AirLanka

Compiled by Our Staff From Dispatches HONG KONG — What (Holdings) Ltd. said Thursday that it was not holding "serious" discussions with any potential buyer for its Omni hotels in the United States, but it did not rule out such a sale.

4.3

The conglomerate has been approached by "a number of parties" that would like to buy the hotels, but "we're not in scrious discussions with any parties," said Quinn Y.K. Law,

Wharf's financial officer. His comments followed reports that Smith Barney inc. last month approached Hospitality Franchise Systems Inc. about buying Omni, which Wharf acquired in 1988.

Mr. Law said the conglomerate had not retained the New York-based securides company to orchestrate any sale.

THE FRONT PAGE 1887-1992' A BOOK OF GREAT FRONT PAGES FROM THE INTERNATIONAL HERALD TRIBUNE
REPORTING THE MAJOR EVENTS OF THE PAST CENTURY.

Reproductions of 150 from pages, many with Herald Tribune exclusive articles, like first-hand reports from the sinking Tuanic, the Drevius trial, the 1981 failed coup in Madrid, the hurried departure of Marcos from Manila — and the Venice campanile caught in mid-collapse by a Tribune photographer! Follow coverage of the First World War by one of the few new spapers that staved in Paris and was virtually edited

Read about people - Queen Victoria, Lindbergh, jack the Ripper, the Windsors, Khomeini, Gorbachev - a century of news headliners and the events that surrounded them.

Hardcover, 27 x 37 cms(10.5 x 14 ins), 168 pages, readable-size text. The book is divided into six chronological sections, each with an introduction describing the period from historical and journalistic viewpoints.

THE FRONT PAGE 1887-1992 is a distinctive personal or business gift. Order one — or several — today.

PRIME MINISTER PREDICTS STRONG AND STEADY PROGRESS

Born in 1951, Maris Gailis earned a ing sector] have shown, that assumpdegree in mechanical engineering in 1978. After holding a number of industrial posts, Mr. Gailis entered politics in 1990, serving as director of the international economic relations department of the Latvian government. Over the next four years, he held a variety of ministry-level governmental positions before becoming

prime minister in September 1994. As the key economic figures show, it has been a year of progress for Latvia. Yet the country's mood is not as positive as it was in the early days, when Latvia's economic and political situation was highly tenuous. What is the ex-

> 'By responding decisively to recent events, our institutions have demonstrated the underlying strength of our democracy' Maris Gailis

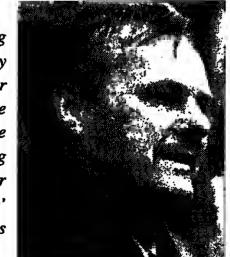

planation for this paradoxical situa-

Perhaps human nature. The last of the past's major struggles - the fight to gain independence, the introduction of a totally new economic form and a new currency - largely came to a successful end three years ago. Since then, we Larvians have experienced a relatively untroubled period of strong political stability and economic and social progress. During this period, an unconscious, unspoken assumption has taken root in our population; that the time of upheavals is gone and will never come

back again. As the recent shake-ups [in the bank-

tion is as invalid in Latvia as in any other country. Setbacks are an inevitable part of any country's life. The test of a country's mettle is how it handles these setbacks, whether or not its institutions respond to them in a capable and proper way.

And Latvia's institutions have been responding very well. Two of the guiding features of our system of democracy are a strong parliament capable of articulating concerns and of formulating a broadly based consensus, and a central bank given a great deal of independence in the setting of fiscal policy. Over the past few weeks, the decisive-

ness of our parliament and the independence of our central bank have proven the key to the solving of our current problems. By responding decisively to the recent weeks' events, our institutions have demonstrated the underlying

strength of our democracy. One of the controversies of the past was the olleged inability of the Russians (who account for 32 percent of the total population) and other national groups living in Latvia to gain Latvian citizenship. Your government put forward a plan setting forth an orderly transition to Latvian citizenship for citizens of the former Soviet Union. Haw

In this case, no news has been very good news. The total absence of reports of discontent among ethnic Russians living in Latvia is one very good indicator of the extent of the quiet progress made toward integrating foreign nationals into our society.

As you will remember, our procedures governing the attaining of citizenship set forth three requirements: a minimum period of residency in the country, a proficiency in Latvian and a working knowledge in Latvian history, requirements very similar to those in force in the United States. To help our Russians achieve this proficiency and knowledge, we have set up special edu-cational programs. They have been well-attended, indicating a strong interest in attaining Latvian citizenship. For those non-Latvian citizens wishing to travel during this period of transition. we are providing appropriate docu-

Anywhere you care to look in Latvia's economic and cultural life. you will find Russians playing a highly active role, just as Latvians are highly active in the neighboring areas of Russia and Belarus.

The conventianal wisdom sees Latvia as settling down to a period of steady, unspectacular growth. Do you endurse this scenario?

Not in the slightest. After years of re-structuring and learning, our economy is poised to record significant advances on national and international markets. Our privatization program has reached new height of activity, and international interest in investing in the program's industrial companies has never been greater.

A number of manufacturers, primarily in the wood- and food-processing and construction sectors, are establishing themselves on national and international markets. We are making steady. strong progress toward further upgrading our relationship with the European Union. Large-scale opportunities are emerging in our energy and transport facility sectors, and specifically in our

Rather than incremental increases, Latvia will be taking major steps forward in the years in come.

AFTER YEARS OF NATION-BUILDING, A BOLD MOVE FORWARD

This year is expected to bring significant changes to post-Soviet Latvia.

he six years following Latvia's in-dependence from the Soviet Union have brought breathtaking developments to the country. In 1990 and 1991, the Latvians wrested their independence from the Soviet Union. whose population was hundreds of times larger than that of Latvia and which had an incomparable advantage in military might. In 1992, the newly formed Bank of Latvia launched the Latvian ruble, a move accompanied by a vast restructuring of what had been

By 1993, the rechristened Lat had become the hardest currency east of the Deutsche mark, Latvia's bank had become Central and Eastern Europe's role model for probity and professionalism, ultra-liberal currency regulations had been put in place and Latvia was in the midst of an unprecedented financial

and trade services boom. The growth of its financial and traderelated service sectors, in tum, allowed Latvia to break the fall in living standards and to tame the hyper-inflation bequeathed to it by the Soviet system.

Turnaround point By mid-1994, after only a little more than two years of full-scale restructuring, the magic turnaround point was reached. The country entered the growth column - ahead of many of its counterparts in Central and Eastern Europe, nearly all of which had started their restructuring efforts years prior to

Latvia's latest figures are good, but certainly not dramatic. The figures speak of steady overall economic growth, fiscal stability and several persisting but undramatic problems.

After recording a rise in gross domestic product of 2 percent (according to the IMF) or 2.5 percent (according to Latvia's ministry of finance) in 1994, Latvia looks set to double that figure in 1995, ranking it among the leaders in Central and Eastern Europe.

Latvia's citizens are fully sharing in this growth. Reflecting the breadth of the mid-year turnaround, the country's income and wealth-per-household figures reached new highs in 1994. The rate of unemployment hovered between 6 percent and 7 percent during the year - high for the Ballic region, comfortably low for Europe as a

The real rate of unemployment is probably much lower than that, suggest local employers. "Finding good, qualified workers is getting more and more difficult," states one manufacturer. "Many of them, although officially registered as being out of work, are in fact quite gainfully employed off the books."

Earned, not purchased

Of equal importance, this growth has been earned, not purchased through deficit spending. According to Latvia's Ministry of Finance, the government's total external debt amounted to a very modest \$345.6 million at the end of 1994 - or about 10 percent of GDP. The federal government's budget deficit came to 1.9 percent of total expenditures, about half of the comparable figure for Germany, putting Lutvin

well within the Maastricht guidelines. This indebtedness is more than counterbalanced by the \$570 million in net foreign reserves held by the Bank of Latvia as of Dec. 31, 1994; the figure

represents an all-time high. Although this wide range of accomplishments has earned Latvia the praise of international economic experts, they advance one major criticism: Latvia has yet to restructure its "legacy economy," the mass of unwieldy and often inefficient industrial enterprises bethe Soviet system. The nub of the criticism concerns the country's privatization program, which has been successful in other areas but has failed to score notable successes in the

legacy economy. Major restructuring

"Latvia can always subsist on supplying services linking Russia and the rest of the eastern Baltic with international markets," Manfred Meier-Preschany. Laivia's chief economic advisor, said in mid-1994, "To thrive, the country will have to attempt a major industrial and managerial restructuring."

The figures for 1994 confirm his observations. After showing a strong 18

It is too early to tell whether this rise is a temporary aberration or the start of a long-term trend, but one thing has been apparent for months: 1995 will be the year of an uncompromising indus-

trial restructuring.
"By the end of 1996, all of our industrial companies - with a few key exceptions - will have been sold to the private sector, or put into liquidation," says Janis Naglis, head of Latvia's privatization program. "Our program has been in high gear for a bit more than a a, as the figures show, the results of this wave of privatization are beginning to make themselves appar-

Privatization picks up

An accelerated pace of privatization is just one of the processes at work, according to Mr. Meier-Preschany. In Latvia, over the past few years, several hundred million dollars of foreign and locally based investment have flowed into newly founded companies, subsidiaries and joint ventures." Mr. Meier-Preschany says. "These are primarily located in such sectors as wood and food processing and light consumer and capital goods. It takes time

Higher incomes: Latvians are sharing fully in the country's economic growth.

percent rise in 1993, exports fell by about that amount in 1994, sending the country's balance of trade - positive over the previous two years - into the red. Powered by a strong performance in the service sector, the country's balance of payments was basically at the

break-even point for the year.

The cause of this expon drop was an percent fall in industrial output in 1994. According to preliminary published figures, that figure has jurned around during the first three months of 1995 - showing, for instance, a 20 percent rise in March as compared with

for such investments to work their way through the pipeline, for new plants to be built and existing ones to be reequipped. The investments of 1992 and 1993 are only now beginning to make their presence felt in the industrial sta-

Maris Gailis, the country's prime minister, points out that "there is a tremendous awareness throughout Latvia's business and official communities as to how important this restructuring is and what is at stake for the country, as well as a broad-based willingness to do whatever it takes to make the restructuring succeed."

ing sector.
"It takes time to get a fullblown regulatory and monitoring system in place," says Ilmars Rimsevics, the Bank of Latvia's vice chairman. "We have been working very hard over the past four years to set up monitoring and enforcement systems capable of assuring adher-

ence to the stringent capitaladequacy and balance-sheet accountability standards we established at the outset."

These standards are indeed very stringent. Latvia's banks are required to maintain reserves equivalent to 8 percent of their average deposits with the Bank of Latvia, to have at least 2 million Lat (\$3.9 million') in initial capital, to maintain a 10 percent ratio of share capital to total assets - two percentage points above the figure specified by the Basel Commission - and to avoid imbalances in lending and the holding of equity stakes.

Quiet reorganization

By enforcing these standards and monitoring its banks' performance through its own examinations (65 of which were carried out in 1994), the Bank of Latvia has been quietly carrying out a reorganization of the country's banking sector, weeding out the black sheep and shoring up the problem chil-

In 1994, for instance, the bank revoked the licenses of 11 banks, with a further six declared insolvent and two recapitalized.

In 1994, the Bank of Latvia also made it mandatory for Latvia's banks to have their books audited by recognized independent companies, and set up a binding period of compli-

Privatization: A Scorecard

A look at the successful restructuring of Latvia's privatization program.

In March 1994, Latvia nies. On Sept. 1, 1994, the completely reorganized its State Property Fund privatization system. Over the previous three years, 256 large-scale industrial corporations and more than 5,200 small-scale retailing, service and skilled trades companies had been returned to the private sector via straight sales and long-term leaseholds.

New agency On April 22, 1994, the Privatization Agency of the Republic of Latvia started up operations. Headed by Janis Naglis, the agency handles the final preparation and sale of privatization candidates. In addition to those sold via the two tenders, the agency has privatized 40 compa-

launched its activities. It was set up as the single, residual owner of all nonprivatized industrial companies in the country, of which there were 1,500 at the time.

International tenders On Dec. 22, 1994, the Priva-

tization Agency concluded its first international tender. It was a huge success. Some 45 companies received 176 bids, of which just under half were from abroad. To date, 24 of these companies have been returned to the private sector, with the rest expected to follow over the next few months.

On April 27, 1994, the

second international tender was completed. Some 46 companies were put up for

Of the 182 bids, roughly half were from abroad. Mr. Naglis expects the tender evaluation process to have been completed by the end of the summer.

September offering A third international tender has been scheduled for September. It, too, will feature

between 40 and 50 companies. Latvian citizens bave been prime purchasers of their country's corporations. To date, 2.2 million Latvians had subscribed to vouchers worth 2.7 billion Lat (about \$5 billion).

"Riga airport - a 30 percent rise in air traffic" trumpeted an article in the Baltic Observer, an essential English-language source of information on Latvia. The rise was for the first quarter of 1995, as compared with the same period a year earlier. It was caused by the growing vulume of business and holiday travel between Riga and Westem Europe.

Numerous attractions

This increase has been produced by a wide variety of positive factors. Based on the sketchy figures available, international interest in viewing Latvia's large number of natural, cultural and architectural attractions seems to be growing strongly. The number of transactions carried out between Latvia and the Western world has been rising

Attracting more and more visitors to the country has been a growing number of cheap flights and attractive hotels.

Nothing dissuades travelers from visiting the country, aside from the Baltic's often unpredictable weather. There are no difficulties involved in entering the country. Visas are quickly and courteously supplied at points of entry. They are free of charge for Americans and not required for the British, and they cost between \$20 and \$40 for citizens of other EU countries. depending upon the type of visa ap-

Payments in major currencies

Nor are there are any difficulties in-volved in getting to downtown Riga, some 15 minutes away from the airport. Taxis are reliable; the fare is \$14 for those booked via the airport service, much cheaper for regular taxis. The drivers give receipts as a matter of course and accept payment in any major currency - a statement that applies to nearly all commercial outlets in

In many European cities, any reasonably priced hotel is far removed from

easy walking distance of its historic center. Nor is walking about in Riga an exercise in risk-taking. The city is generally regarded as one of the safest in

Easy communications

Also missing from Riga (and to a lesser extent, from the rest of Latvia) are communication problems. As befits a city that has lived from the international traffic in goods and ideas for nearly eight centuries, Riga's citizens are polyglot, with proficiencies in English and German being widely prevalent. Nor is it difficult to reach all of

Latvia's many natural and cultural attractions. Buses are somewhat better than trains, which are adequate but slow, and the country is not covered with superhighways.

Nevertheless, the longest possible trip within the country from Riga is some 270 kilometers, which brings the visitor to Pasiene and its cluster of improbably Mediterranean baroque

A RULING PASSION: NATION SHOWCASES WEALTH OF ARCHITECTURAL TREASURES

The bane of the Latvian past has become a blessing for today's travelers.

Throughout its history, Latvia was never very large and very rarely united. For most of the time, it was a patchwork of duchies and fiefdoms, nearly all of them under foreign control.

From the Bremen-based prelates and traders who founded Riga in 1201 to the Russian autocrats holding sway in the mid-19th century, each of the for-eign rulers brought their own architeceign rulers brought their own architec-tural style, turning Latvia's communi-ties and countryside into a highly eclec-tic and wide-ranging exhibition of 800 years of ruling architectural passions. The prime exhibit is Rundale, locat-ed 80 kilometers (50 miles) south of

Riga.
For anyone who has been to northern Italy or St. Petersburg, this resplendent 18th century palace, seat of a minor Courlandian dynasty, will look very fa-miliar. Its architect was Francesco Bartolomeo Rastrelli, the Italian who designed the Winter Palace and many other royal buildings in St. Petersburg.

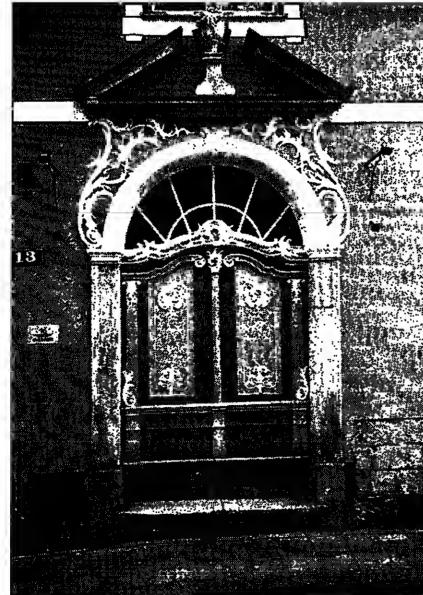

Nordic Gothic

One hundred and sixty five kilometers to the west is one of Scandinavia's ultimate architectural statements. Located on Latvia's Baltic coast, the castle of Edole was first built in 1253. Among its many owners were Danish potentates, who put the stern stamp of

Nordic Gothic upon its lines. Between Scandinavia and Italy are some of Germany's best-preserved 16th century half-timbered lodges, 18th century villas still bespeaking the glory of Greater Poland and 14th century guild halls built by its era's most rapa-cious might - the Hanseatic League.

Not to be outdone by foreigners, the Larvians have also been avid builders and city planners in their own right, ea-gerly importing and adapting prevail-

ing looks and style. In the late 19th century, Latvianbased architects and designers took "Jugendstil" - a Viennese style perfected in Budapest. Barcelona and Glasgow - and transformed it into a lavish pacan to the expressive abilities of pacan to the expressive assumed to stone, glass and ceramics. By the time Riga. Turret for turret and drawbridge

Foreign rulers - and ambitious Latvian architects - have bequeathed a highly eclectic mix of architectural styles.

the architects were done. Riga alone for drawbridge, the late 19th century had 800 of Europe's most sumptuous Jugendstil buildings.

palaces at Stameriena, Jaungulbene, Lielstraupe, Nogale and elsewhere ri-Nor were their efforts confined to val Neuschwanstein's splendor and or-

Latvia...

and Russia

Despite occasional flurries of aggressive rhetoric, relations between Latvia and Russia have continued to improve. A 'most tavored nation" trade agreement has been in force between the two countries since June. 1, 1994, one of 18 such agreements concluded by Latvia. 36 77

One major remaining bone of contention. is that Latvia, like many countries in Central

Russia:

and Eastern Europa, is highly interested to joining NATO, o find epocate country has perfucipated to NATO's "Partnership for Peace" maneuvers.

As is the case with direct moves by for mer Soviet satelities, the pleasions have been vaciliating between granging toleration of Latvia's plans and unequivocal opposition.

ORLANDO, Florida - The Houston Rockets survived a sorry start, then blew a lead in the second half. Only to get a clutch shot at the end of regulation, and an even bigger one at the end of overtime. In other words, a typical night at the

In the end it was Hakeem Olajuwon's tip-in of Clyde Drexler's missed shot with three-tenths of a second left in

NBA FINAL

the overtime that handed the Rockets a 120-118 victory over the Orlando Magic in a terrific start to the NBA championship series Wednesday night.

Dennis Scott had tied it for Orlando with a 3-pointer with 5.5 seconds to go in overtime, much as Houston's Kenny Smith had tied the score with 1.6 seconds left in regulation.

"It's been like this since the beginning of the playoffs, Olajuwon said. "This was a classic example of all that we have been going through. There's a lot of hasketball left. Winning Game I gets us one step closer, hut it's not going to be easy. This Orlando team has

so much talent. They're warriors. They will fight back."

After Scott's shot had made it 108-all in overtime, the Rockets had time to draw up one play. They put the ball in Drexler's hands. He drove into the lane and, when Shaquille O'Neal came over to help out on defense, missed. But O'Neal had allowed Olaiuwon to get into position to win the game. "We did a lot of things

wrong," said guard Anfernee Hardaway of the Magic. "We started making bad mistakes, but if we fix all the mistakes in Game 2, we'll be all right."

After trailing by as many as 20 in the first half, then leading by as many as nine in the second, the Rockets took a 1-0 lead in this best-of-seven series. It was nothing new for the team that has tied an NBA record hy winning six straight playoff games on the road.

Orlando's Nick Anderson helped some by missing four free throws in the final 10 seconds of regulation.

"I haven't missed four free throws in a row in who knows when, so f think it was more of a mental thing," he said.

The last two misses came with 6.1 seconds left, and gave Houston, trailing by three, enough time to run a play. Smith dribbled to the top of the

Hakeem Olajuwon and Shaquille O'Neal went at it, until O'Neal went off elsewhere.

key against Hardaway and sank 3-pointer to make it 110-110. torch David Rohinson in the Western Conference final, Orlando's coach, Brian Hill, decided that Olajuwon would not be allowed to play any more

one-on-one games. So each time

Blue Jays Stop White Sox Slumping Thomas Upset by 3 Walks, No Hits

The Big Hurt was really sore. Frank Thomas, the league's two-time most-valuable player, let loose Wednesday night with how fed up he was about not getting pitches he could swing at. The profanity-laced quasinews conference came after the visiting Toronto Blue Jays beat the Chicago White Sox. 4-3, a loss that saw Thomas ground

into a double play with the bases loaded in the fourth and strike out looking in the ninth. He walked three times, giving him 48 in 37 games and ahead of the pace last season that saw him walked 109 times in 113

"This baseball is getting old," Thomas said, "It's boring. This is weak stuff they play in col-lege. This is the big leagues. No

one player is that dangerous. This is just trash." Thomas, who is in an 0-for-12 slump, saw his average drop below .300 in a season that has already had an 0-for-13 slump. "It's very frustrating," he said. "I'm getting fed up with it. It's going to be a long season."
The Blue Jays, who had lost

the first two games of the three-

game series, scored all their runs in the fifth inning. Devon White's fourth homer followed a leadoff single by Domingo Cedeno and made it 2-1.

has "an excellent chance for recovery" after getting a new liver in a 71/2 hour transplant operation Thursday that, doctors said, ran into some initial difficulty because of scar tissue from earlier gall bladder sur-

gery.

The new liver was draining properly and the Hall of Fame baseball player's kidneys were working again, the lead transplant surgeon, Dr. Robert Goldstein, said in the after-

noon.
"He now has an excellent chance for recovery," Goldstein said. "He's very stable but still

Goldstein said that Mantle had "a week, maybe two to live": had he not received a new liver. Mantle was moved to inten-

sive care where he was to re-main for at least 24 hours. Goldstein said that time period is the most critical to make sure the liver continues functioning and that there is no bleeding.

"He is 63 years old, which puts him in our elderly population, and you just have to watch him to be sure," Goldstein said. Mantle's liver had been deteriorating because of a small malignant tumor, years of alcohol abuse and a long dormant hepa-titis C infection, doctors said.

The five-year survival expectancy for someone who has received a liver transplant is about 70 percent. But because of Mantle's age and alcohol problems, his chances probably would be about 60 percent, said

The surgeon said doctors will continue to monitor for any problems developing from the repatitis.

A liver donor was found late: Wednesday and, once tests showed the organ was compatible with Mantle, surgery began about 4 A.M., said Jennifer Jones, a spokeswoman at Baylor University Medical Center.

Mantle was hospitalized on with the disease, then of May 28 complaining of steam heart attack last year a ach pains. Although doctors made his condition public Wednesday, they notified the Southwest Organ Bank Inc. on Tuesday that a new liver was

The organization's director, Alison Smith said it was not too imusual for an organ to be found within two days because Mantle's poor health placed him in the Status 2 category.

"His medical condition was worse than any other recipient we had listed from the local area," she said. "I'm sure there will be people who refuse to believe there wasn't some special consideration given because of who he is, but that will not be the case. We hope people realize we work as hard to recover organs for everyone on the waiting list."

A Paralysis Points Up Rugby Inequities

By Ian Thomsen

CAPE TOWN, South Africa - His teammates and coaches have returned home to Ivory Coast, but Max Brito remains behind in a Pretoria hospital bed, understanding that the Rugby World Cup will stay with him and never leave.

His paralyzing injury has demonstrated the severity of the challenge for small teams like that of Ivory Coast, which qualified for the 16-team finals with its African Zone upset one year ago against Namihia. The team was expected to lose all three matches here, and it did. Fulfilling the dream of competing on this stage was Supposed to be the point.
Two minutes into the last game, Brito

heart attack last year at age 36. was tackled by one Tongan and another

two fell on him. When they got up he was still conscious, but he couldn't move. An operation this week stabilized the fourth and fifth vertebrae of his neck, allowing him to lift his head. He will prohably be paralyzed below the neck for the rest of his life. He is 24. There can be no fulfillment after something like that.

"He is still weak but he was definitely better," said his hrother, Fabrice, who also plays righy. "We'll support him to the end. He's mentally very strong and I'm sure he will be able to do something despite his condition."

Dan Hearn, paralyzed in 1967 while playing for England against New Zealand. has criticized the tournament for mismatching teams. The Rugby World Cup is just a nine-year-old convention, intent on growing internationally what has been a relatively

to invite 20 seams. In effect, that will mean four more teams no more able to compete than the Ivory Coast of Max Brito.

The authorities should learn from this because top level rughy is no longer a game for the inexperienced," Hearn told the Guardian newspaper in England. "Asking the Ivory Coast, a country with no rugby pedigree, to play against what are effec-tively professionals does the game a disser-

A survey of the Scottish Rugby Union in 1993-94 revealed Thursday that rugby has the highest risk of any European team sport. Of the 1,169 players studied during matches, practice games and training sessions, 361 were injured - almost half during tackles. It did not survey spinal

A Fluke, and Lindros, Give Flyers a Victory, and New Life

EAST RUTHERFORD. New Jersey — The Philadelphia Flyers finally broke through the New Jersey Devils' center-ice traps and Martin Brodeur's been possible had it not been masterly goaltending, but oot Romero, 20-1; Colonial Secretary, Jose Santos, 50-1; Knockadoon, Chris McCarron, 15-1; Thunder Gulch, Gary Stevens, 2-1; Timber Country, Pat Day, 6-5, and Star Standard, Julie Krone, 6-1. with their backpassing, or their

forechecking, or their extra hits. First it was a fluky bounce on a flip shot from the point late in

the third period, then it was the rehable Erie Lindros. He scored on a rare odd-man

hreak by the Flyers 4:19 into the first overtime as Philadelphia patiently fought its way back into the Eastern Conference final by beating the Devils, 3-2, on Wednesday night.

But the midfielder's agent, Steve Kutner, said that "Paul was every bit as surprised as the fans when they heard that United bad The victory, in what was almost a do-or-good-bye game for the Flyers, cut the Devils' lead in · Arsenal, which fired George Graham in February over allegations of irregular transfer payments, named Bruce Rioch its manager. the best-of-7 series to 2-I. Game

4 will also be played in the at the right point when he sud-Meadowlands Arena on Satur- denly spotted Lindros skating day afternoon, with Game 5 alone down the middle of the ice. back in Philadelphia on Sunday. But Game 5 would not have dros snapped off a shot from the een possible had it not been top of the left circle that went for a fluky goal by Rod Brinjust inside the goalpost.

d'Amour that tied the score with 6:03 left in regulation. At that point, the Flyers looked like a team ready to go

NHL PLAYOFFS

3-0 down in the series, and one ready to be swept.

That, however, changed when Brind'Amour flipped a shot at Brodeur. The puck landed five feet in front of the goalie, and bounced over his right

pad into the net.
"We had two guys going to
the net and I just tried to delay a little hit," said Brind'Amour, who had been held without a goal in the series. "I threw it at him hoping for a rebound, but it just bounced the right way. It was the hreak we needed."

Brodeur said he never saw it "It was a nightmare when it went into the net," he said.

Lindros made his night even worse, scoring on a great crossice pass from Mikael Renberg at the end of a 3-on-2 run by the Flyers' "Legion of Doom" line. Renberg was holding the puck

He sent a pass across and Lin-

"I never saw Lindros coming in late," said Brodeur, who had a 1.29 goals against average in 12 playoff games. "I was playing the 2-on-2 at the blueline. Renberg made the long pass across and boom! Lindros was all alone." And just as quiekly the Flyers were revived.

"That was a hig goal for us," said Kevin Dineen, who scored the Flyers' first goal. Like 1 say, your big guy scores the big goals

and we got it from him tonight."
"We had to win this game,"
Renberg said. "If we didn't we almost would have been dead. Now we're still alive."

That's not what the Devils wanted after thoroughly dominating the opening two games in Philadelphia.

Sánchez Vicario, **Graf Gain Final**

No. 1 Ranking Also at Stake

By Christopher Clarey Special to the Herald Tribune

PARIS — Arantxa Sánchez Vicario versus Steffi Graf in the French Open final. The matchup appears every bit as logical and inevitable as

professors shuffling through the Louvre or tourists craning their necks at the Eiffel Tower. After all, Sanchez Vicario

and Graf have played catch with the No. I ranking all year. Both have won the French at least twice and both earn their daily hread and the bulk of their computer points from the baseline from which claycourt matches are won and lost. But for all their victories, the

recent past has not gone smoothly for the two most celebrated players now active in women's tennis. Their health has caused them problems, gnawing away at their confidence and effectiveness.

And perhaps that is why there was more than a whiff of relief in the bumid air after Thursday's semifinals at Stade Roland Garros. Neither Graf nor Sánchez Vicario played well hut both played well enough. First came Sanchez Vicario's 7-5, 6-3 defeat of Japan's precedent-setting Kimiko Date.
Then came Graf's remarkably uneven 6-3, 6-7 (5-7), 6-3 victory over Conchita Martinez.
"I was not 100 percent but I

I was not 100 percent but I am still in the final, so I feel very happy," said Sanchez Vi-cario, the defending champion and No. 1 seed in Paris.

To hang on to the No. 1 rank-ing that she holds so dear, she will have to beat Graf in Saturday's final, If not, Graf will reclaim the spot she has held off and on since 1987.

Graf elearly cares more about victory than ranking. For the first time in nearly nine years, she does not hold one of the Grand Slam singles titles. Mary Pierce hlew her off the court here in the semifinals last year. Then Lori McNeil upset her in the first round at Wimbledon and Sanchez Vicario beat her in the U.S. Open final.

A lower back bone spur also helped beat her in that match, and led Graf to withdraw from four events. After deciding clay and, on Tuesday night, was against major surgery, she whipped herself into shape, only to miss the Australian Open with a strained right calf muscle.

But since her emotional return to the circuit in Fehruary, she has won 24 straight matches and had not lost a set until the fourth-seeded Martinez, herself the winner of 24 straight on clay this spring, rallied to make it

interesting Thursday. Martinez started poorly, making unforced errors off both wings and falling behind, 4-0. And though she rallied to win 12 of the next 14 points and make it 4-3, she faded again. Not only did she lose the first set, she

fell behind, 4-1, in the second. Luckily for Martinez, Graf was hardly on top of her game, either. She wound up making 67

unforced errors, many with her usually reliable slice backhand. Serving for the match at 5-4 in the second set, she played an edgy game, knocking a short forehand into the net to allow Martinez to even the score. Then, at 5-5 in the tichreaker, she missed two more makable forehands to lose the set.

"I wasn't nervous, but it was so difficult to play," Graf said.
"With her, she plays it high and
plays it low, mixes it up so easy mistakes. It was really dif-

ficult to find my rhythm."

She was out of rhythm again in the third set, falling behind by 0-40 on her serve at 3-3. But Martinez missed the next three service returns, hurling her racket after the third, and Graf held serve, then put an end to Martinez's invincibility on clay. "I lost my opportunity there," Martinez admitted.

Date, hardly known for her claycourt prowess, had oppor-tunities of her own. The first semifinals of the French Open, she has a game from a different era. With her straight back-swings and flat strokes, she looks like she learned tennis by reading — if not necessarily

memorizing — an instruction manual by Chris Evert. But Date, at age 24, has de-veloped into a dangerous customer on all surfaces and, for most of the first set, she took the hall on the rise and kept the speedy Sánchez Vicario off balgame at 5-6 cost her the first set.

And though she led, 2-0, in the second, she lost her serve and the edge in the sixth game, in which several long rallies left her gasping for air. She won only two more points after that,

It is perhaps testimony to the current state of women's tennis that even Sánchez Vicario, who has been fighting off a stomach virus and a fever with antibiotics the last week, has not dropped a set on her way to the final. Perhaps it is also testimony to her considerable pluck.

After being whipped by Pierce in the Australian Open final, she hart her ankle in March and missed almost a month. She then won two tournaments on dancing, antibiotics and all, after midnight with her parents, Emilio and Marisa, at the ITF World Champions' dinner,

"l am not a machine," Sánchez Vicario said, with a grin. "I am a human being."

Too Many Candidates

By Russell Baker

NEW YORK — So many persons are now running for president that it makes your head spin. Republicans have candidates you've never heard of. Democrats so far have only times when Americans have no President Clinton. Amazingly, need for cheap foreign labor to he is trying hard to keep other take jobs too awful to interest our Democrats from running.

There are other amazing things about Clinton. For instance, he started running for a second term even before he was see Congress in permanent reinaugurated for the first.

ideas about what he wanted to do tions. with his first term. Was he keeping them a secret so he could surprise us in his second term?

As everybody knows, he started running for president blesome, obnoxious, out-ofwhen he was a high schooler. control billions of people -You'd think by the time he fioished college a man who started running in high school would have exciting ideas of what to do in his first term.

Well, you'd think that and I'd think that, but maybe shrewd politicians think more subtly than we do. I don't say this is bow the Clinton mind works, you are at war, my fellow and I don't say there is anything ill advised about keeping your vision thing a secret until the second term. It would take unmitigated gall to criticize the tactics of a man whose tactics have already won him one term, and my gall is mitigated.
The Republican candidates,

or at least those I can keep in mind, have unmitigated gall galore and incredibly clear vision things. I keep them sorted out by imagining the kind of country each would bring us.
Under President Newt Gin-

grich, for instance, I see a lot of balloons. I mean big brightly colored balloons that use hot gas to raise baskets of people into

the sky so high. Gingrich, you see, is a romantic and a dreamer and a devotee of science.

President Pete Wilson's America would be different. No balloons in Wilsonian America. They would make it too easy for foreigners to cross our borders at own citizens.

Wilson is a Californian. So I cess, since all government would The amazing thing here is, he didn't seem to have any fixed erendum and initiative elec-

The New York Times.

Tossing Off Virtuoso Licks With Arturo Sandoval

By Mike Zwerin tional Herald Tribune

PARIS — Arturo Sandoval plays virtuoso trumpet from screech to pedal notes with the confidence of a ranked tennis player at the top of his game aiming for the lines. Tossing off a fast lick from Dizzy Gillespie's "Be Bop," he lays the born gently to rest on the bed and says he always practices in hotel rooms "until they start banging on the walls."

Cubans tend to play the trumpet like bull-fighters. He overflows more than fills the room. His excellent English is melodiously Spanish-accented. "Nothing," he sighs, "nothing is

'Cuban music is rich and varied. Salsa is only a condiment, not a music.'

easy on the trumpet. The trumpet is a pain in the butt. If you don't practice every single day, you play bad.

Sandoval was born in 1949 in Artemisa, a suburb of Havana, studied classical trumpet and was a founding member of the esteemed group Irakere, which combined Cuban traditional music, rock and jazz. He has played Telemann. Vivaldi, Hummel and Leopold Mozart with the BBC Symphony and others and has given trumpet master classes in conservatories in London. Paris and the Soviet Union. His album "Danzon" won a Grammy in the Latin Jazz category in 1994 and he was featured (with Tony Benneπ) during this year's Superbowl halftime show.

Irakere was known for checking into ratty hotels, usually near railroad stations, and traveling long distances second class. Despite their reputation and exciting, groundbreaking style, they never saw their contracts: "We never knew what we were getting paid. We just went wherever they sent us, there were always bodyguards, and they would give us, like, \$15 a day pocket money." Sandoval managed to perform in the United States several times, despite the embargo. After the critic Leonard Feather wrote a formal request to the State Department, he was granted a 48-hour visa to play the Hollywood Bowl with Woody Herman's band on the occasion of its 50th anniversary

Playing the Jazz Jamboree in Warsaw in

Conover's programs. He was caught listening to one in the barracks during his military service. The sergeant called it "the voice of the enemy" and seot him to the stockade for three months. "Which," he says, "is one reason I live in Miami now.

Life in Cuba did oot please him, but it was home. Describing his love for his island, he cites a Cuban high-jump champion, Cuban ballet dancers, the female volleyball team and the chess master Capablanca: "It's a crazy wonderful country, It's my own land." Arturo Sandoval became another name Cubans are proud of.

Although "the government owned my brain and my soul, they cootrolled me like a marionette," he did not want to leave without his wife and son. Friends had defected, saying they would bring their families later. And they ended up losing whatever they had together. Not wanting to take that risk, he bided his time.

In early 1990, wheo Gillespie, who had be-

come his meotor, hired him for a two-and-a-halfmonth European tour, he saw his chance. Since he had already booked a three-month tour with his own band, he would be in Europe almost six months. He asked the Ministry of Culture to allow his wife and son to visit him during the tour. "I am 40 years old," he said. "That is too

long to be separated from my family.

"Imagine." He stops to reflect. "You have to ask their permission to travel with your own family. My wife and I discussed it walking on the beach, we did not trust the security of our own home. Nobody knew about the plan but she and I, oobody." The ministry agreed, he does not know

why.
The Gillespie band was in Athens when Sandoval's wife and son arrived in London. Gillespie, whose tours for the State Department had made him a sort of cultural ambassador at large, went with him to the American embassy, where he asked for political asylum. He was told to continue the tour and they would process the papers and give him further instructions.

Less than a week later, however, in a small town in northern Italy, Sandoval received a phone call from his wife. She and their son were in a friend's house in the country outside London, lying low. She told him she'd heard that the Cuban government knew he had asked for asylum and wanted all three of them on the next plane to Havana. She said she had been threatened. She was afraid.

Sandoval went to Gillespie's hotel room and Playing the Jazz Jamboree in warsaw in 1979, he was happy to meet the Voice of America disk jockey Willis Conover. Like many young jazzmen in Communist countries, Sandoval had learned the repertoire listening to make short version and the story, He was happy to meet the Voice of Cillespie said, "If you go back they'll put you many young jazzmen in Communist countries, Sandoval had learned the repertoire listening to make the story, He was escorted on to a plane by embassy people in James an attractusing grantings to make that this is the "short version" of the story. He was escorted on to a plane by embassy people in jail," Wearing his famed bemused-guru expression, he reached into a bag, pulled out a from London. They met in New York, moved Michael Jackson 'ketchup'?"

"Nothing is easy on the trumpet. If you don't practice every day, you play bad."

disorganized bundle of papers and finally found with no money or work to Miami and have lived what he was looking for — the number of a with no money or work to Miami and have lived there happily ever since.

"How did they find out you asked for asyon Air Force One to play at an independance lum?"
ceremony in Namibia. He dialed the emergency at that. number he had been given.
Sandoval interupts the tale to shake his head:

Dizzy, may the good Lord bless him."

The White House heard the story and said, "Don't move, we'll get back to you." The phone rang just before 2, the American ambassador in Rome. He promised to arrange to send a car to take Sandoval's family to the U.S. Embassy in London. He stops again to point out that this is the "short version" of the story. He

lum?" "That's a good question." He leaves it

Before concluding, he asks, just about begs, to be quoted on-the-record dissing the concept and name of salsa music. His new album, "The Latin Train" (GRP), explores a number of Cuban styles like mambo, danzon, son montuno, guajira, guaracha, songo and chachacha. "Cuban music is rich and varied," he says. "Salsa is only a condiment, a spice, not a music. The name is an advertising gimmick to make money from the alienation of Cuban musicians.
